

GCS16 SERIES

GCS16 series units in the 6 ton and larger cooling size are packaged combination two-stage gas heat / two-stage dx cool units designed for commercial applications. Gas heat sections are designed with Lennox' aluminized steel tube heat exchangers ranging in size from 135,000 to 470,000 Btu/h input. Units are designed for rooftop or side of building installation with either bottom or horizontal discharge and return air.

For commercial applications, the GCS16 is designed to accept any of several different thermostat control systems with minimum field wiring. Control options such as economizer, warm up kit, Honeywell W5073 control, Honeywell W7400 control or other field specified controls connect to the unit with jack-plugs. When "plugged in" the controls become an integral part of the unit wiring. Units are also equipped with a low voltage terminal strip to facilitate thermostat field wiring.

All specifications in this manual are subject to change.
