■ Level adjustment

- Leveling the washing machine properly prevents excessive noise and vibration. Install the appliance on a solid and level floor surface, preferably in a corner of the room.

- If the floor is uneven, adjust the adjustable feet as required. (Do not insert pieces of wood, etc. under the feet.)
- Make sure that all four feet are stable and resting on the floor and then check that the appliance is perfectly level. (Use a leveling tool.)
- After the washer is level, tighten the lock nuts up against of the base of the washer. All lock nuts must be tightened.

* Diagonal Check

When pushing down the edges of the washing machine top plate diagonally, the machine should not move up and down at all. (Please, check both directions.)

If the machine rocks when pushing the machine top plate diagonally, adjust the feet again.
