

INSTALLATION INSTRUCTIONS

■ Installation clearances

The location must be large enough to fully open the washer door.

■ Washer dimensions

[Side view]

[Front view]

- Most installations require a minimum 4 in. (10 cm) clearance behind the washer.

■ Minimum installation spacing for recessed area installation.

The following dimensions shown are for the minimum spacing allowed. Additional spacing should be considered for installation and servicing.

- Additional clearances might be required for wall, door and floor moldings.
- Additional spacing of 1 in. (2.5 cm) on all sides of the washer is recommended to reduce noise transfer.

Companion appliance spacing should also be considered.

■ Level floor

- Allowable slope under entire washer is 1".
- To minimize noise and vibration, the washer **MUST** be installed on a solidly constructed floor.
- Carpeting and soft tile surfaces are not recommended.
- Never install the washer on a platform or weakly supported structure.

NOTE: A firm, solid floor is even more critical to a front-loading washer than to a top-loader. If your floor is wood and/or frame construction, you may need to reinforce it. Front-loaders are substantially faster spin speeds than top-loaders, causing greater vibration. If the floor is not solid, your washer will vibrate. You will hear and feel the vibration throughout your house.

■ Power outlet

- Must be within 60 in. (1.5 m) of either side of the washer. Do not overload the outlet with more than one appliance.
- Time-delay fuse or circuit breaker is recommended.

NOTE: It is the personal responsibility and obligation of the customer to have a proper outlet installed by a qualified electrician.
