Debates in Mathematics Education Dawn Leslie, Heather Mendick, 2013-10-01 *Debates in Mathematics Education* explores the major issues that mathematics teachers encounter in their daily lives. It engages with established and contemporary debates, promotes and supports critical reflection, and aims to stimulate both novice and experienced teachers to reach informed judgements and argue their point of view with deeper theoretical knowledge and understanding. Written by experts in the field of mathematics education, it investigates and offers fresh insight into topics of central importance including Gender, social inequality and mathematics, Mathematics, politics and climate change, The history and culture of mathematics, Using popular culture in the mathematics classroom, The concept of ability and its impact on learning, What we mean by teaching for understanding, Choosing and using examples in teaching, The fitness of formal examinations. Designed to stimulate discussion and support you in your own research, writing and practice, *Debates in Mathematics Education* will be a valuable resource for any student or practising teacher engaged in initial teacher training, continuing professional development or Masters level study. It also has much to offer to those leading initial teacher education programmes and to beginning doctoral students looking for a survey of the field of mathematics education research. **Education under Siege** Mortimore, Peter, 2013-09-23 At a time when education is considered crucial to a country's economic success, recent UK governments have insisted their reforms are the only way to make England's system world class. Yet pupils are tested rather than educated, teachers bullied rather than trusted, and parents cast as winners or losers in a gamble for school places. *Education under siege* considers the English education system as it is and as it might be. In a highly accessible style, Peter Mortimore, an author with wide experience of the education sector both in the UK and abroad, identifies the current system's strengths and weaknesses. He concludes that England has some of the best teachers in the world but one of the most muddled systems. Challenging the government's view that there is no alternative, he proposes radical changes to help all schools become good schools. They include a system of schools receiving a fair balance of pupils who learn easily and those who do not, ensuring a more even spread of effective teachers, as well as banning league tables, outlawing selection, opening up faith schools, and integrating private schools into the state system. In the final chapter, he asks readers who share his concerns to demand that the politicians alter course. The book will appeal to parents, education students, and teachers, as well as everyone interested in the future education of our children. **Parliamentary Debates (Hansard)**. Great Britain. Parliament. House of Commons, 2012. **Mastering Mathematics WJEC GCSE Practice Book** Keith Pledger, Gareth Cole, Joe Petran, Linda Mason, 2017-03-31 *GCSE Maths WJEC Linear Workbook - Foundation* CGP Books, 2010-06-08 GCSE Maths WJEC Workbook with online edition Foundation
