factores tendientes a desencadenar una sucesión de eventos inseguros que podrían desembocar en un incidente o en un accidente de consecuencias catastróficas. Cuando se analiza la comunicación oral y escrita es importante tener en cuenta que si bien manejamos un vocabulario técnico en común es inevitable tanto en inglés como en español el uso de regionalismos y argot/jargon en inglés. Por ejemplo un técnico ecuatoriano hablará de la bitacorá de la aeronave mientras que uno argentino hablará de la libreta historial de la aeronave. Esta divergencia puede justificarse como un caso de regionalismos de países diferentes. Ahora bien en el segundo ejemplo el mismo técnico argentino en la provincia de Buenos Aires hablará de chavetas para frenar un bulón mientras que otro técnico argentino en Córdoba hablará de cupillas para frenar un bulón. En paralelo se puede ver también que los diferentes fabricantes tienen lexicos específicos con respecto a sus productos por ejemplo uno de los más conocidos fabricantes británicos de motores posee un sistema propio de códigos de denominación y aplicación de Boletines de Servicio no mandatorios muy distinto al que manejan sus competidores directos de Estados Unidos y Canadá. Por eso la intención de este manual iii es contemplar una cantidad importante de tales divergencias presentándolas en cada asiento específico para que el uso del término y el concepto se apliquen con la mayor propiedad posible. La propuesta de este manual es constituirse en una obra de referencia pensada como apoyo idiomático para interpretar y utilizar con mayor exactitud todos los niveles en que se presenta la terminología aeronáutica y contribuir a la aclaración de las dudas que continuamente se dan en la traducción de ambas lenguas en los diferentes campos de la aviación.

In the Event of a Water Landing Michael G. Walling, 2010. In the Event of a Water Landing. At 8 15 A M on October 14 1947 Chuck Martin the 26 year old pilot of the Boeing 314 flying boat named Bermuda Sky Queen attempted to do what had never been done before land an 88 000 pound aircraft in thirty five foot high seas. The lives of sixty eight passengers and crew on board depended on his ability. A mile away was the 327 foot US Coast Guard Cutter George M Bibb. The cutter's crew watched as the plane descended. If Sky Queen survived the landing getting the passengers to safety would be their job. Nine years later and half a world away Captain Richard Ogg flying the Pan American Airways Stratocruiser Sovereign of the Skies was forced ditch the aircraft along with its forty three passengers and crew. The Coast Guard was nearby. Manning Ocean Station. November was the US Coast Guard Cutter Pontchartrain. Once more rescuing the survivors would be in their hands. In the Event of a Water Landing tells for the first time the full stories of the Bermuda Sky Queen and Sovereign of the Skies rescues the only two completely successful open ocean ditchings in Commercial Aviation history. These two stories encompass many facets of ditchings bad weather engine failure horrific sea conditions and indomitable courage in the face of death. Between these two are tales of other ditchings as well as the journey we humans have undertaken from the beginning of transoceanic flight to today. Using the voices of passengers flight crew and those who rescued them an amazing tale unfolds. Their vivid memories interspersed with contemporary news reports serve to flesh out the unemotional entries from official investigations. These ditchings and rescues embody the hopes fears and courage of people facing death.

one of aviation's most remarkable survival stories. The meticulous layout of facts alongside poignant personal accounts ensures that readers are not only informed but also inspired, making this book a significant addition to the canon of aviation literature.

The True Story of the "Miracle on the Hudson" National Transportation Safety Board, 2022-11-13

In *The True Story of the Miracle on the Hudson*, the National Transportation Safety Board meticulously documents the flight of US Airways Flight 1549, which famously executed an emergency landing in the Hudson River on January 15, 2009. Blending detailed technical analysis with gripping narrative, the book explores the events leading up to the incident, the critical decision-making processes of the flight crew, and the subsequent rescue efforts. Its literary style balances a formal investigation tone with accessible storytelling, making it an essential study within the context of aviation safety literature and emergency response protocols.

The National Transportation Safety Board (NTSB), an independent U.S. government agency dedicated to civil transportation accident investigation, has been at the forefront of aviation safety enhancement since its inception in 1967. By compiling firsthand accounts, investigative findings, and technical data, the NTSB aims to uncover systemic issues, cultivating a deeper understanding of both human and mechanical factors that contribute to aviation accidents. This publication reflects the NTSB's commitment to preventing future tragedies through education and transparency.

This book is highly recommended for aviation enthusiasts, safety professionals, and general readers alike. By illustrating the intricate interplay of human skill, technology, and fleet safety procedures, the NTSB not only honors the heroism displayed during the crisis but also emphasizes the importance of learning from such events to enhance future safety protocols.
