Machado de Assis is not only Brazil's most celebrated writer but also a writer of world stature who has been championed by the likes of Philip Roth, Susan Sontag, Allen Ginsberg, John Updike and Salman Rushdie. In his masterpiece the 1881 novel *The Posthumous Memoirs of Brás Cubas* translated also as *Epitaph of a Small Winner* the ghost of a decadent and disagreeable aristocrat decides to write his memoir. He dedicates it to the worms gnawing at his corpse and tells of his failed romances and halfhearted political ambitions serves up harebrained philosophies and complains with gusto from the depths of his grave. Wildly imaginative, wickedly witty and ahead of its time the novel has been compared to the work of everyone from Cervantes to Sterne to Joyce to Nabokov to Borges to Calvino and has influenced generations of writers around the world. This new English translation is the first to include extensive notes providing crucial historical and cultural context. Unlike other editions it also preserves Machado's original chapter breaks each of the novel's 160 short chapters begins on a new page and includes excerpts from previous versions of the novel never before published in English. The Flaneur in Nineteenth-Century British Literary Culture Isabel Vila-Cabanes, 2018-10-15 The flaneur is a cultural and literary phenomenon usually associated with nineteenth-century Paris but the type also exists in the artistic and literary panorama of other major European capitals such as London, Berlin and Moscow. Despite massive recent interest in the figure of the flaneur in scholarly studies analyses about the nineteenth-century British analogue are often fragmentary appearing in the form of isolated articles. However there is an abundant amount of nineteenth-century novels, sketches and journalistic essays which offer remarkable and hitherto overlooked accounts of the British metropolis and which frequently include the figure of the flaneur as a central character or the topic of flânerie as a theme. This book explores a great array of texts making an essential contribution to our knowledge and understanding of the prehistory or rather history of the British flaneur from the early eighteenth century to the early twentieth century with a special focus on the nineteenth century. The flaneur is looked at as a figure in which the development and dynamics of the modern metropolis and its impact on the literary discourse are manifested from a formal as well as thematic perspective.
