Literacy in Grades 4-8 Nancy L. Cecil, Joan P. Gipe, Merrill E. Marcy, 2017-10-23 Comprehensive yet succinct and readable Literacy in Grades 4-8 Third Edition offers a wealth of practical ideas to help preservice and practicing teachers create a balanced and comprehensive literacy program while exploring the core topics and issues of literacy in grades 4 through 8. It addresses teaching to standards, differentiating instruction for readers and writers, motivating students using assessment to inform instruction, integrating technology into the classroom, working with English learners and struggling readers, and connecting with caregivers. Selected classroom strategies, procedures, and activities represent the most effective practices according to research and the many outstanding classroom teachers who were observed and interviewed for the book. The Third Edition includes added material connecting the Common Core State Standards to the instruction and assessment of literacy skills, a combined word study and vocabulary chapter to help readers integrate these important topics in their teaching, more on technology including comprehension of multimodal texts, enhancing writing instruction with technology tools, and teaching activities with an added technology component. Added discussion of teacher techniques during text discussions, strategic moves that help students become more strategic readers, and key features in the Classroom vignettes. More than 50 activities, some with a technology component, questions for journal writing, and for projects and field-based activities. Troubleshooting sections offering alternative suggestions and activities for those middle-grade students who may find a particular literacy focus challenging.

Understanding and Evaluating Research Sue L. T. McGregor, 2017-10-25 Understanding and Evaluating Research: A Critical Guide shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.
