Coleman, PhD, 2017-05-25 In this book The Art of Explanation General Chemistry the author shares with you the key concepts of general chemistry with problems sets that allow you to not only work out problems but rather define and discuss the principles of chemistry When you master understanding the definition a light bulb in your head will turn on and thus you will know it and will be able to explain it You will have mastered the art of explanation Catalog of Copyright Entries Library of Congress. and uncertainty Although objectivity is not synonymous with truth or certainty it has eclipsed other epistemic virtues and to be objective is often used as a synonym for scientific Recent scholarship in history and philosophy of science has shown that it is not the experimental data Baconian orgy of quantification but rather the diversity plurality in a scientific discipline that contributes toward understanding objectivity History of science shows that objectivity and subjectivity can be considered as the two poles of a continuum and this dualism leads to a conflict in understanding the evolving nature of objectivity The history of objectivity is nothing less than the history of science itself and the evolving and varying forms of objectivity does not mean that one replaced the other in a sequence but rather each form supplements the others This book is remarkable for its insistence that the philosophy of science and in particular that discipline s analysis of objectivity as the supposed hallmark of the scientific method is of direct value to teachers of science Meticulously yet in a most readable way Mansoor Niaz looks at the way objectivity has been dealt with over the years in influential educational journals and in textbooks it s fascinating how certain perspectives fade while basic questions show no sign of going away There are few books that take both philosophy and education seriously this one does Roald Hoffmann Cornell University chemist writer and Nobel Laureate in Chemistry **General Catalog** University of Missouri,1928 *Agriculture, Rural Development, and Related Agencies Appropriations for 1979* United States.
