*The Complete Encyclopedia of Television Programs, 1947-1979* Vincent Terrace,1979    *The Complete Encyclopedia of Television Programs, 1947-1976* Vincent Terrace,1976 A detailed alphabetical anthology that traces the medium of television from the pioneering programs of the middle forties to the established programs of the seventies Preface    Further Adventures of a Grumpy Old Rock Star Rick Wakeman,2010-01-26 What do Postman Pat Tommy Cooper Norman Wisdom and George Best have in common with being abandoned in a Costa Rican jungle after a severe bout of flatulence Indeed how are they also connected to trying to buy an Australian brewery just to get a beer owning twenty two cars an American soccer team and a Swiss mail order pornography company The common feature is of course a certain Richard Wakeman The Further Adventures of a Grumpy Old Rock Star takes you the privileged reader on a trip of absurd excess a cultural car crash of side splitting hilarity and an unforgettable glimpse again into the life of one of Britain s most legendary showmen rock stars and all time great raconteurs    Pop Goes the Decade Ralph G. Giordano,2017-06-05 Covering significant historical and cultural moments public figures and celebrities art and entertainment and technology that influenced life during the decade this book documents the 1950s through the lens of popular culture On the surface the 1950s was a time of post war prosperity and abundance However in spite of a relaxation of immigration policies the good life in the 50s was mainly confined to white non ethnic Americans A new Cold War with the Soviet Union intended to contain the threat of Communism and the resulting red scare tinged the experience of all U S citizens during the decade This book examines the key trends people and movements of the 1950s and inspects them within a larger cultural and social context By highlighting controversies in the decade readers will gain a better understanding of the social values and thinking of the time The examination of the individuals who influenced American culture in the 1950s enables students to gauge the tension between established norms of conformity and those figures that used pop culture as a broad avenue for change either intentionally or by accident    Stand Up to Bullying! Phyllis Kaufman Goodstein,Elizabeth Verdick,2014-10-03 Who has the most power to stop and prevent bullying Teachers Parents The Principal of the Universe No no and no way When it comes to changing bullying behavior nobody has more power than upstanders all the people who see bullying or know it s happening and decide to do something about it How strong are upstanders Stronger than a snarling seventh grader More powerful than a petty put down Able to delete Internet rumors with a single click When BYstanders choose to act as UPstanders they are real superheroes    **Breached!** Daniel J. Solove,Woodrow Hartzog,2022-02-28 A novel account of how the law contributes to the insecurity of our data and a bold way to rethink it Digital connections permeate our lives and so do data breaches Given that we must be online for basic communication finance healthcare and more it is alarming how difficult it is to create rules for securing our personal information Despite the passage of many data security laws data breaches are increasing at a record pace In Breached Daniel Solove and Woodrow Hartzog two of the world s leading experts on privacy and data security argue that the law fails

because ironically it focuses too much on the breach itself Drawing insights from many fascinating stories about data breaches Solove and Hartzog show how major breaches could have been prevented or mitigated through a different approach to data security rules Current law is counterproductive It pummels organizations that have suffered a breach but doesn't address the many other actors that contribute to the problem software companies that create vulnerable software device companies that make insecure devices government policymakers who write regulations that increase security risks organizations that train people to engage in risky behaviors and more Although humans are the weakest link for data security policies and technologies are often designed with a poor understanding of human behavior Breached corrects this course by focusing on the human side of security Drawing from public health theory and a nuanced understanding of risk Solove and Hartzog set out a holistic vision for data security law one that holds all actors accountable understands security broadly and in relationship to privacy looks to prevention and mitigation rather than reaction and works by accepting human limitations rather than being in denial of them The book closes with a roadmap for how we can reboot law and policy surrounding data security
