t warrant the meager legal status of property. Now they have more rights and protections than any other animal in the country. Some say they're even on the verge of becoming legal persons. How did we get here and what happens next? In this fascinating exploration of the changing status of dogs and cats in society, pet lover and award-winning journalist David Grimm explores the rich and surprising history of our favorite companion animals. He treks the long and often torturous path from their wild origins to their dark days in the middle ages to their current standing as the most valued animals on Earth. As he travels across the country riding along with Los Angeles detectives as they investigate animal cruelty cases, touring the devastation of New Orleans in search of the orphaned pets of Hurricane Katrina, and coming face to face with wolves and feral cats, Grimm reveals the changing social attitudes that have turned pets into family members and the remarkable laws and court cases that have elevated them to quasi-citizens. The journey to citizenship isn't a smooth one, however. As Grimm finds, there's plenty of opposition to the rising status of cats and dogs. From scientists and farmers worried that our affection for pets could spill over to livestock and lab rats to philosophers who say the only way to save society is to wipe cats and dogs from the face of the earth, the battle lines are being drawn. We are entering a new age of pets, one that is fundamentally transforming our relationship with these animals and reshaping the very fabric of society. For pet lovers or anyone interested in how we decide who gets to be a person in today's world, *Citizen Canine* is a must-read. It is a pet book like no other. **Job Family Series**, 1962

Visual Impairment and Work Sally French, 2017-02-17 This book traces the development of paid work for visually impaired people in the UK from the 18th century to the present day. It gives a voice to visually impaired people to talk about their working lives and documents the history of employment from their experience, an approach which is severely lacking in the current literature about visual impairment and employment. By analysing fifty in-depth face-to-face interviews with visually impaired people talking about their working lives, featuring those who have worked in traditional jobs such as telephony, physiotherapy, and piano tuning, to those who have pursued more unusual occupations and professions, and grouping them according to occupation and framed by documentary historical research, these stories can be situated in their broader political, economic, ideological, and cultural contexts. The themes that emerge will help to inform present-day policy and practice within a context of high unemployment amongst visually impaired people of working age. It is part of a growing literature which gives voice to disabled people about their own lives and which adds to the growing academic discipline of disability studies and the empowerment of disabled people. *Interviewing Guides for Specific Disabilities* United States.
