*50 Reasons People Give for Believing in a God* Guy P. Harrison, 2009-09-18 Many books that challenge religious belief from a skeptical point of view take a combative tone that is almost guaranteed to alienate believers or they present complex philosophical or scientific arguments that fail to reach the average reader This is undoubtedly an ineffective way of encouraging people to develop critical thinking about religion This unique approach to skepticism presents fifty commonly heard reasons people often give for believing in a God and then raises legitimate questions regarding these reasons showing in each case that there is much room for doubt Whether you're a believer a complete skeptic or somewhere in between you'll find this review of traditional and more recent arguments for the existence of God refreshing approachable and enlightening From religion as the foundation of morality to the authority of sacred books the compelling religious testimony of influential people near death experiences arguments from Intelligent Design and much more Harrison respectfully describes each rationale for belief and then politely shows the deficiencies that any good skeptic would point out As a journalist who has traveled widely and interviewed many highly accomplished people quite a number of whom are believers the author appreciates the variety of belief and the ways in which people seek to make religion compatible with scientific thought Nonetheless he shows that despite the prevalence of belief in God or religious belief in intelligent people in the end there are no unassailable reasons for believing in a God For skeptics looking for appealing ways to approach their believing friends or believers who are not afraid to consider a skeptical challenge this book makes for very stimulating reading

*50 Popular Beliefs that People Think are True* Guy P. Harrison, 2012 What would it take to create a world in which fantasy is not confused for fact and public policy is based on objective reality asks Neil deGrasse Tyson science popularizer and author of *Astrophysics for People in a Hurry* I don't know for sure But a good place to start would be for everyone on earth to read this book Maybe you know someone who swears by the reliability of psychics or who is in regular contact with angels Or perhaps you're trying to find a nice way of dissuading someone from wasting money on a homeopathy cure Or you met someone at a party who insisted the Holocaust never happened or that no one ever walked on the moon How do you find a gently persuasive way of steering people away from unfounded beliefs bogus cures conspiracy theories and the like This down to earth entertaining exploration of commonly held extraordinary claims will help you set the record straight The author a veteran journalist has not only surveyed a vast body of literature but has also interviewed leading scientists explored the most haunted house in America frolicked in the inviting waters of the Bermuda Triangle and even talked to a contrite Roswell alien He is not out simply to debunk unfounded beliefs Wherever possible he presents alternative scientific explanations which in most cases are even more fascinating than the wildest speculation For example stories about UFOs and alien abductions lack good evidence but science gives us plenty of reasons to keep exploring outer space for evidence that life exists elsewhere in the vast universe The proof for Bigfoot or the Loch Ness Monster may be nonexistent but scientists are regularly discovering new species some of which are truly stranger than fiction Stressing the excitement of scientific discovery and the legitimate mysteries and wonder inherent in reality this book invites readers to share the joys of rational thinking and the skeptical approach to evaluating our extraordinary world

**Unapologetic** John W. Loftus, 2016-11-01 Just as intelligent design is not a legitimate branch of biology in public educational institutions nor should the philosophy of religion be a legitimate branch of philosophy So argues acclaimed author John W. Loftus in this forceful takedown of the very discipline in which he was trained In his call for ending the philosophy of religion he argues that as it is presently being practiced the main reason the discipline exists is to serve the faith claims of Christianity Most of philosophy of religion has become little more than an effort to defend and rationalize preexisting Christian beliefs If subjects such as biology chemistry physics and geology are all taught without reference to faith based supernatural forces as explanations faith based teachings should not be acceptable in this discipline either While the book offers a fascinating study of the fallacies and flaws on which one whole field of study rests it speaks to something much larger in the ongoing culture wars By highlighting the stark differences between faith based reasoning and evidence

based reasoning Loftus presents vital arguments and lessons about the importance of critical thinking not only in all aspects of study but also in life His conclusions and recommendations thus resonate far beyond the ivory towers and ivy covered walls of academic institutions

**A Manual for Creating Atheists** Peter Boghossian,2014-07-01 For thousands of years the faithful have honed proselytizing strategies and talked people into believing the truth of one holy book or another Indeed the faithful often view converting others as an obligation of their faith and are trained from an early age to spread their unique brand of religion The result is a world broken in large part by unquestioned faith As an urgently needed counter to this tried and true tradition of religious evangelism A Manual for Creating Atheists offers the first ever guide not for talking people into faith but for talking them out of it Peter Boghossian draws on the tools he has developed and used for more than 20 years as a philosopher and educator to teach how to engage the faithful in conversations that will help them value reason and rationality cast doubt on their religious beliefs mistrust their faith abandon superstition and irrationality and ultimately embrace reason

Good Thinking Guy P. Harrison,2015-10-06 Critical thinking skills are essential for life in the 21st century In this follow up to his introductory guide Think and continuing his trademark of hopeful skepticism Guy Harrison demonstrates in a detailed fashion how to sort through bad ideas unfounded claims and bogus information to drill down to the most salient facts By explaining how the human brain works and outing its most irrational processes this book provides the thinking tools that will help you make better decisions ask the right questions at the right time know what to look for when evaluating information and understand how your own brain subconsciously clouds your judgment Think you re too smart to be easily misled Harrison summarizes scientific research showing how easily even intelligent and well educated people can be fooled We all suffer from cognitive biases embellished memories and the tendency to kowtow to authority figures or be duped by dubious truths packaged in appealing stories And as primates we are naturally status seekers so we are prone to irrational beliefs that seem to enhance our sense of belonging and ranking Emotional impulses and stress also all too often lead us into traps of misperception and bad judgment Understanding what science has discovered about the brain makes you better equipped to cope with its built in pitfalls Good Thinking the book and the practice makes clear that with knowledge and the right thinking skills anyone can lead a safer wiser more efficient and productive life

McAfee,2022-06-29 This essential guide to coming out as a non believer has been written to make it easier for atheists agnostics freethinkers and non believers of all ages and backgrounds to be open about their non religiosity while minimizing the negative interactions in familial social and professional circles As a survival guide for non believers who wish to come out this book provides advice and resources for those interested in publicly rejecting religious dogma as well as real stories from non believers who have experienced coming out to less than supportive family or friends Whether you re new to disbelief and looking for the cleanest possible break from your former faith or you re a lifelong atheist who wants to establish a sense of community with like minded people this guide

provides useful resources including tips for handling potential conflicts with believers the author s answers to some of the most frequently asked questions on behalf of believers and numerous references to support groups services and advocacy organizations dedicated to non theists From dealing with grief from a secular perspective to handling potential clashes in religious worldviews between significant others this book offers multiple perspectives from non religious individuals who have generously shared their experiences to help those atheists who may find themselves in similar situations *God Loves You: Some Restrictions May Apply* Tony Davis,2019-04-10 *God Loves You Some Restrictions May Apply* and *Many Other Christian Dilemmas* is written by a fairly well educated extensively travelled former Southern Baptist Bible Banger SB3 professional layman retired military intelligence officer and keen observer of the human condition who happens to be fascinated with what we believe why and the effects of those beliefs on society This is an appeal to honesty in the terms of epistemological disquisition a critical analysis of the major truth claims of religion especially Christianity apologetic justifications and foundational documents Written from 2008 until 2018 parts of this book were written on four continents in twenty five countries including an active combat zone so forget the lie about no atheists in foxholes and a number of the United States The book s focus is religion but the implications are applicable to all dogmatic belief systems The emphasis on religion is because it is perhaps the most pervasive and sublime crystallization of systematic dogmatic thinking in the human condition This book is not intended for a single audience but for several It is to serve as a reference work for unbelievers who simply don t know how to articulate their unbelief It is a position statement of why the author no longer believes For those who are on the fence and might need a source against which to evaluate their own questions it may be helpful And finally it is for the devoutly religious for two reasons to explain why not everyone agrees with them and to appeal for them to at least be honest when articulating their own beliefs *The American Short-horn Herd Book* Lewis Falley Allen,William T. Bailey,1886 *Wallace's Year-book of Trotting and Pacing in ...* John Hankins Wallace,1902 *Wallace's Year-book of Trotting and Pacing in* ,1907 *Life Driven Purpose* Dan Barker,2015-04-01 Every thinking person wants to lead a life of meaning and purpose For thousands of years holy books have told us that such a life is available only through obedience and submission to some higher power Today the faithful keep popular devotionals and tracts within easy reach on bedside tables and mobile devices all communicating this common message Life is meaningless without God In this volume former pastor Dan Barker eloquently powerfully and rationally upends this long held belief Offering words of enrichment emancipation and inspiration he reminds us how millions of atheists lead happy loving moral and purpose filled lives Practicing what he preaches he also demonstrates through his own personal journey that life is valuable for its own sake that meaning and purpose come not from above but from within **The Insurance Year Book** ,1918 *American Short-horn Herd Book, Containing Pedigrees of Short-horn Cattle* American Short-horn Breeders' Association,1912 **Wallace's Year Book of Trotting and Pacing** United States Trotting Association,1918 *The Book of Matriculations and Degrees* University of Cambridge,1913 **No**

**Sacred Cows** David G. McAfee, Yvette d'Entremont, 2017-08-22 While belief in religious supernatural claims is waning throughout the West evidence suggests belief in nonreligious supernatural claims is on the rise What explains this contradiction How can a society with a falling belief in God have a rising belief in ghosts psychic powers ancient astronauts and other supernatural or pseudo scientific phenomena Taking the same anthropological approach he employed in his notable studies of religion atheist author and activist David G McAfee turns his attention to nonreligious faith based claims Whether going undercover as a medium getting tested at Scientology headquarters in Los Angeles or interviewing celebrity paranormalists and famous skeptics he leaves no stone unturned in his investigation As in the case of religion he finds an unwillingness among believers to critically examine their most closely held convictions Only once individuals honestly assess their own sacred cows will they be able to ensure that their beliefs conform to the known facts and that our decisions as a society are based on the best available evidence      **The Chicago Daily News Almanac and Year Book for ...** ,1908
