the Study of Temperament and Early Education Outcomes Cynthia L. Smith, David J. Bridgett, 2020-06-29 This book furthers understanding of how child temperament is linked to educational outcomes through mediating and moderating factors As the importance of socio emotional development for educational outcomes is increasingly recognized understanding the influence that children's temperament which includes their emotional reactivity and regulation of emotions cognitions and behaviors can have on educational factors such as school readiness and academic achievement is crucial First the chapters in this book examine pathways connecting temperament with educational outcomes for example one study reports that toddler negative affect predicted executive functioning which then predicted achievement at age six The second way that chapters in this book examine links between temperament and education is by identifying factors that make associations between temperament and educational outcomes more salient for example findings from one study show that shyness and negative emotion were more strongly associated with lower academic achievement only when children received fewer than nine hours of sleep each night highlighting the importance of sleep By examining pathways through which temperament

exerts effects on educational outcomes i.e. mediators or factors that modify associations between temperament and educational outcomes i.e. moderators the potential for interventions aimed at improving early educational outcomes can be fully realized This book was originally published as a special issue of Early Education and Development
