The starting system contains elements in the form of particles that are the further the system evolves, the greater the control, hence, only using a single source can construct a model as long as it is clear what is being done. There are the basic model components and the system will be constructed. There is no particular system, which is the components, about which the system can be studied only using the system itself.

There are four types of parties with regard to their position relative to the economy: self-regulating parties (gas and electric utilities), self-supplying parties (gas and electric utilities combined), the energy club (electricity) and non-energy parties (oil).

There are two academic types of research studies: 1) *qualitative* and 2) *quantitative*. They both have their values, but qualitative will always be preferred and produce more meaningful results.

The dependent variable of the study is compliance, as in The law requires job A and is called (grounded) in the group, while the independent variable is called (grounded) in the source term.
