Learning to Read, Learning Religion Britta Juska-Bacher, Matthew Grenby, Tuija Laine, Wendelin Sroka, 2023-01-06 Catechism primers are inconspicuous but telling little books for children combining the teaching of reading skills and religious catechesis From the 16th to the 19th centuries they have been produced disseminated and used in huge numbers in many regions of the world in particular in Europe Remarkably similar texts appeared across the continent spanning confessional traditions that were in other respects highly divergent In different places and across the whole period different denominations used not only similar pedagogical and religious strategies but also shared the same formats and iconography This volume edited by scholars from Finland Germany Switzerland and the United Kingdom is the result of a collaborative transnational and interdisciplinary effort including education language teaching children's literature book history and religious studies With contributions on seventeen European countries and regions it sheds new light on a fascinating but largely neglected part of European cultural heritage and by establishing a comprehensive and authoritative summary of the field offers fresh impetus for further transnational research

Language in Danger Andrew Dalby, 2003 Every two weeks the world loses another indigenous language Evolving over hundreds or even thousands of years distinct languages are highly complex and extremely adaptable but they are also more fragile and endangered than we might expect Of the approximately 5 000 languages spoken around the globe

today Andrew Dalby predicts that half will be lost during this century How will this linguistic extinction affect our lives Is there a possibility that humanity will become a monolingual species Should we care Language in Danger is an unsettling historical investigation into the disappearance of languages and the consequences that future generations may face Whether describing the effects of Latin s displacement of native languages in the aftermath of Rome s imperial expansion or the aggressive extermination of hundreds of indigenous North American languages through a brutal policy of forcing Native Americans to learn English Dalby reveals that linguistic extinction has traditionally occurred as a result of economic inequality political oppression and even genocide Bringing this historical perspective to bear on the uncertain fate of hundreds of pocket cultures cultures whose languages are endangered by less obvious threats such as multinational economic forces immigration nationalism and global telecommunications Language in Danger speaks out against the progressive silencing of our world s irreplaceable voices More than an uncompromising account of the decline of linguistic diversity Language in Danger explains why humanity must protect its many unique voices Since all languages represent different ways of perceiving mapping and classifying the world they act as repositories for cultural traditions and localized knowledge The growing trend toward linguistic standardization for example politically designated national languages threatens the existence of more marginalized cultures and ethnic customs leaving only a few dominant tongues The resulting languages become less flexible nuanced and inventive as they grow increasingly homogenized Dalby argues that humanity needs linguistic variety not only to communicate but to sustain and enhance our understanding of the world People do not simply invent words out of thin air our creativity and intelligence are to a significant degree dependent on other languages and alternate ways of interpreting the world When languages intermix they borrow and feed off each other and this convergence catalyzes the human imagination making us more intelligent and adaptable beings

Life at DrTom's:
Mostly Humorous Anecdotes by a Mostly Retired Cornell Professor Thomas A. Gavin, 2013-02 Life at DrTom s is a diverse collection of easy to digest anecdotes about human behavior wildlife children wives and more from the perspective of a retired Ivy League professor DrTom taught classes in biology and conservation at Cornell University for almost 30 years and he conducted research on birds and mammals in the U S and abroad But he has found that observing humans and describing the human condition are as interesting as the study of wild animals DrTom writes with a somewhat cynical view about his own species in a way that will make you say hey I never thought of that Spanning six decades DrTom describes the colorful experiences that vary from studying squirrels on a cattle ranch in Idaho living in the rainforest of Costa Rica attending a geisha like party in Korea playing tennis for Ohio State to smoking a cigar while sipping a scotch in the forest surrounding his New York home These moments have sharpened his power of observation and informed his impression of what makes human behavior so curious But this life long exploration of what makes life interesting has generated the tangible he celebrates the most the memory of these rich encounters Readers will have no difficulty relating to DrTom s

observations and conclusions about the experiences he shares You will see yourself in many of the uncanny situations in which he has found himself as a father grandfather husband teacher and retired baby boomer Regardless of your age gender or educational background the prose will make you laugh or pause or think more deeply about what you see around you

Second Language Processing Nan Jiang,2018-03-19 Second Language Processing An Introduction is the first textbook to offer a thorough introduction to the field of second language processing SLP The study of SLP seeks to illuminate the cognitive processes underlying the processing of a non native language While current literature tends to focus on one topic or area of research this textbook aims to bring these different research strands together in a single volume elucidating their particularities while also demonstrating the relationships between them The book begins by outlining what is entailed in the study of SLP how it relates to other fields of study and some of the main issues shared across its subareas It then moves into an exploration of the three major areas of current research in the field phonological processing lexical processing and sentence processing Each chapter provides a broad overview of the topic and covers the major research methods models and studies germane to that area of study Ideal for students and researchers working in this growing field Second Language Processing will serve as the go to guide for a complete examination of the major topics of study in SLP

Europe and the Politics of Language Máiréad Nic Craith,2005-12-14 Do political boundaries impact on concepts of language How significant is language for citizenship in contemporary Europe Can disputed languages acquire full status Should non European languages receive recognition from the EU These are among the many questions explored in this new study of official regional and disputed languages in an ever changing European context Broad policy issues and the performance of the range of instruments of policy at local national and European levels are illustrated with reference to case studies across Europe
