Large Diameter Shield Tunneling Technology Wenbo Zhou, Huiming

Wu, 2024-05-28 This comprehensive guide expertly distills the vast landscape of large diameter shield tunneling technology. Authored by a team of eminent shield technology experts with hands on experience it presents a treasure trove of real world engineering data and examples and simplifies complex concepts for easy comprehension. Its ten chapters offer a structured journey commencing with Chapter 1 which chronicles the global evolution and innovations in large diameter tunnel construction technology. Chapter 2 unveils cutting edge designs and vital functions of contemporary large diameter shield machines. Chapter 3 explores integrated slurry treatment systems emphasizing zero discharge processes while Chapter 4 delves into high precision steel mold design and advanced segment production techniques. Chapters 5 and 6 provide in depth insights into excavation processes encompassing starting and receiving procedures, excavation face stability, shield body posture management, segment assembly and synchronous grouting. Chapter 7 adopts an informatics perspective elucidating data management and control. The critical topic of risk management and countermeasures takes center stage in Chapter 8 while Chapter 9 spotlights domestic large diameter shield tunneling projects and their pivotal technologies. Lastly in Chapter 10 the book offers a forward looking vision for the future of tunneling and shield machine development. Tailored for professionals in design and construction, researchers in scientific institutes and those engaged in tunnel and underground engineering, this book serves as an invaluable resource. This book empowers engineers and technicians at the forefront by enhancing their grasp of large diameter shield tunneling construction technology. It also offers indispensable guidance to design, construction and technical management personnel in the field.

Machu Picchu in Context Mariusz

Ziółkowski, Nicola Masini, José M. Bastante, 2022-11-12 This book aims at integrating archaeology with science in order to provide additional information with respect to a traditional archaeological anthropological perspective. It sheds light on Incan culture, the relation between human frequentation and environmental changes, the Incan architecture in relation with Andean cosmovision using for the first time diverse technological and scientific approaches including LiDAR remote sensing, geophysics and radio carbon dating. A number of recent studies conducted by Polish Italian and Peruvian scientific missions in Machu Picchu, Chachabamba and Cusco are presented and discussed.
