

GCS20 SERIES UNITS

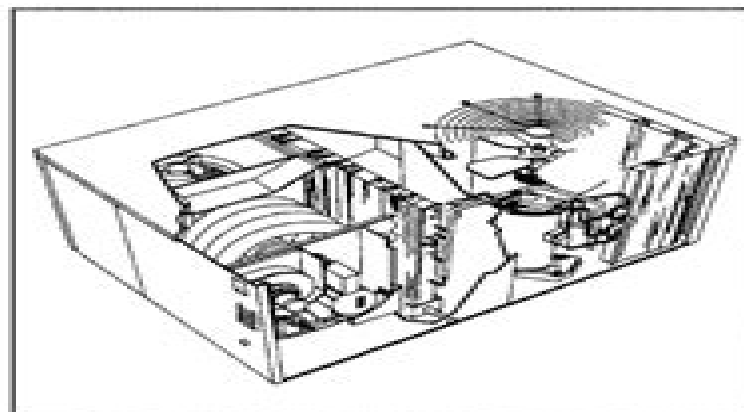

GCS20 series units in the 2, 2 1/2 and 3 ton cooling size are packaged combination gas heat / dx cool units designed for residential applications. Gas heat sections are available with Lennox' new helical heat exchanger in 50,000, 75,000 and 100,000 Btuh input sizes.

The unit utilizes a scroll compressor. The scroll compressor offers high volumetric efficiency, quiet operation and the ability to start under system load. Continuous flank contact, maintained by centrifugal force, minimizes gas leakage and maximizes efficiency. The motor is internally protected from excessive current and temperature.

GCS20H units are designed with horizontal discharge for side of building installation and GCS20R units are designed for rooftop or side of building installation with either bottom or horizontal discharge.

GCS20H units can also be used in a limited commercial application and may be fitted with RDE16 transition to convert the unit to downflow discharge. These converted commercial units may also use an REMD16 or REMD16M economizer.

All specifications in this manual are subject to change.
