

HS21 SERIES UNITS

HS21 early model units (-411, -511, -651) and late model units (-036, -048, -060) are high efficiency residential split-system condensing units which features a two-speed compressor. Models are available in sizes ranging from 3 through 5 tons in either single or three-phase configuration. The series features solid-state two-speed control, which regulates compressor speed in response to thermostat demand. The HS21 is designed for use with an expansion valve at the indoor coil.

This manual is divided into sections which discuss the components, refrigerant system, charging procedures, maintenance and operation sequences.

Information contained in this manual is intended for use by Lennox service technicians only. All specifications are subject to change. Procedures outlined in this manual are presented as a recommendation only and do not supersede or replace local or state codes. In the absence of local or state codes, the guidelines and procedures outlined in this manual (except where noted) are recommended only.
