Thomas Kellaghan, Vincent Greaney

Matric Timetable May June 2015:

Public Examinations Examined Thomas Kellaghan, Vincent Greaney, 2019-11-19 High stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and more important what is learned and how it is learned. By changing aspects of these examinations especially their content and format education systems can have a strong positive impact on teacher behavior and student learning help raise student achievement levels and better prepare students for tertiary level education and for employment. Examination agencies many of which have followed the same procedures over decades can learn from the successes and failures of other systems. This book addresses current issues related to the development administration scoring and usage of these high stakes public examinations identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national regional and state examination boards but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards to academics and researchers interested in educational assessment to governmental and education agencies responsible for student selection and to professionals at development organizations. This extremely well written and comprehensive book offers a timely review of the diversity of public examination practices worldwide of the tensions between examinations and learning and of the technical expertise involved in the creation of valid reliable and fair assessments. It reminds us that as the diploma disease takes hold with an ever greater intensity at every stage of education worldwide and the commercial business of testing flourishes those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog. Angela W Little Professor Emerita Institute of Education University College London. This book is very well structured and written and draws on the authors remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings. Mark Bray UNESCO Chair Professor of Comparative Education University of Hong Kong and former Director UNESCO International Institute for Educational Planning. I am sure that *Public Examinations Examined* which thoroughly analyzes the practice of public examinations in different countries and makes profound and well grounded conclusions will arouse very great interest and will serve to further improve public examinations. Victor Bolotov Distinguished Professor Higher School of Economics National Research University Moscow member Russian Academy of Education and former Deputy Minister of Education Russian Federation.

The Education We Need for a Future We Can't Predict Thomas Hatch, Jordan Corson, Sarah Gerth van den Berg, 2021-01-16 Improve Schools and Transform Education. In order for educational systems to change we must reevaluate deep seated beliefs about learning teaching

schooling and race that perpetuate inequitable opportunities and outcomes Hatch Corson and Gerth van den Berg challenge the narrative when it comes to the grammar of schooling or the conventional structures practices and beliefs that define educational experiences for so many children to cast a new vision of what school could be The book addresses current systemic problems and solutions as it Highlights global examples of successful school change Describes strategies that improve educational opportunities and performance Explores promising approaches in developing new learning opportunities Outlines conditions for supporting wide scale educational improvement This provocative book approaches education reform by highlighting what works while also demonstrating what can be accomplished if we redefine conventional schools We can make the schools we have more efficient more effective and more equitable all while creating powerful opportunities to support all aspects of students development You won t find a better book on system change in education than this one We learn why schools don t change how they can improve what it takes to change a system and in the final analysis the possibilities of system change Above all The Education We Need renders complexity into clarity as the writing is so clear and compelling A powerful read on a topic of utmost importance Michael Fullan Professor Emeritus OISE Universtiy of Toronto I cannot recommend this book highly enough Tom tackles long standing and emerging educational issues in new ways with an impressive understanding of the challenging complexities but also feasible possibilities for ensuring excellence and equity for all students Carol Campbell Associate Professor Ontario Institute for Studies in Education University of Toronto *Final*
