The End of the Innocence Lawrence R. Samuel, 2007-10-01 From April 1964 to October 1965 some 52 million people from around the world flocked to the New York World's Fair an experience that lives on in the memory of many individuals and in America's collective consciousness Taking a perceptive look back at the last of the great world's fairs Samuel offers a vivid portrait of this seminal event and of the cultural climate that surrounded it He also counters critics' assessments of the fair as the ugly duckling of global expositions Opening five months after President Kennedy's assassination the fair allowed millions to celebrate international fellowship while the conflict in Vietnam came to a boil This event was perhaps the last time so many from so far could gather to praise harmony while ignoring cruel realities on such a gargantuan scale This world's fair glorified the postwar American dream of limitless optimism even as a counterculture of sex drugs and rock n roll came into being It could rightly be called the last gasp of that dream The End of the Innocence Samuel's work charts the fair from inception in 1959 to demolition in 1966 and provides a broad overview of the social and cultural dynamics that led to the birth of the event It also traces thematic aspects of the fair with its focus on science technology and the world of the future Accessible entertaining and informative the book is richly illustrated with contemporary photographs

Exploring Management John R. Schermerhorn, 2011-10-11 The primary goal of this edition of Exploring Management is to help build core management competencies for today's global and more complex workplace including issues related to planning organizing leading and controlling POLC with more hands-on type materials such as cases exercises and application Schermerhorn uses a conversational and interactive writing style to master concepts in a bite-size and fundamental approach This text presents managerial concepts and theory in a straight-forward interesting style with a strong emphasis on application The discussion of theory is framed in a unique engaging and concise way The goal is to promote critical thinking and ability to make sound business decisions using managerial theory Concepts are explored and reinforced by most hands-on applications exercises cases and the integration of technology The text also focuses on the most important aspects of the POLC model emphasizing skill building

Report Iowa. Dept. of Public Instruction, 1885 Area Handbook for the Persian Gulf States Richard F. Nyrop, 2008-01-14 Produced by the Foreign Area Studies of The American University for military and other personnel who need a convenient compilation of basic facts about the social economic political and military institutions of various Middle Eastern countries in 1977 this volume remains a useful compendium of information on the area

Begging in America, 1850-1940 Kerry Segrave, 2011-10-14 The poverty that drives people to begging has been a pressing social issue in the United States since the beginning This historical work explores begging and beggars in the period 1850 to 1940 with emphasis on how the police the courts the media and private charity organizations dealt with them Efforts to suppress mendicancy are explored including legislation police crackdowns

and public vouchers for meals and shelter Of particular interest is the way in which media portrayals have guided public perception of mendicants Despite the massive social upheavals the last two centuries have brought all efforts to suppress begging have failed Many of the complaints and arguments made against beggars and begging in 1850 and 1900 and 1940 were also made into the 21st century because in the end the public continued to give alms

Defining Science Charles Alan Taylor,1996 The most interesting entry point to the demarcation problem in science since Popper s seminal formulation Steve Fuller Professor of Sociology Social Policy Durham University What is science What isn t science And who draws the line between them These are rhetorical concerns as Charles A Taylor demonstrates in this ambitious book about the theoretical and cultural underpinnings of scientific practice By showing how boundaries between science and nonscience are rhetorically constructed and socially enforced Defining Science reveals the political and philosophical significance of such distinctions Taylor examines the traditional demarcation problem the problem of defining the boundaries of science as an ongoing rhetorical negotiation involving a full range of historical interests and social actors from researchers and lab technicians to governmental and industrial patrons program administrators political representatives journalists and educators His case studies of the recent debates over creationism and cold fusion clearly demonstrate how the rhetorical dynamics of science operate within different fields In both cases presented here with concision and insight prevailing demarcations or defining portrayals of science emerge as far more nuanced than traditional accounts allow Taylor analyzes traditional approaches to demarcation in science in order to incorporate their insights into his larger rhetorical view His reformulation of philosophical historical and sociological accounts of science clearly illustrates the intellectual value of an interdisciplinary rhetoric of demarcation Furthermore Defining Science suggests how we as a community can positively influence future constructions of science and society This book confronts what is arguably the late twentieth century s definitive problem in a provocative and interesting way It will be of interest to anyone engaged with the question of knowledge in public life Charles Arthur Willard Professor and Chair of the Department of Communication University of Louisville

Who Owns the Media? Benjamin M. Compaine,Douglas Gomery,2000-07-13 This long awaited third edition analyzes corporate ownership of major media including television film on line and print and includes primary influences government s roles and key criteria for evaluating the current state of media ownership
