Imperative Robert Zemsky, Susan Shaman, 2017-12-22 Thinking about American higher education as an economic market changes everything. It is no surprise that college tuition and student debt are on the rise. Universities no longer charge tuition to simply cover costs. They are market enterprises that charge whatever the market will bear. Institutional ambition along with increasing competition for students now shape the economics of higher education. In *The Market Imperative*, Robert Zemsky and Susan Shaman argue that too many institutional leaders and policy makers do not understand how deeply the consumer markets they promoted have changed American higher education. Instead of functioning as a single integrated industry, higher education is in fact a collection of segmented and more or less separate markets. These markets have their own distinctive operating constraints and logics, especially regarding price. But those most responsible for federal higher education policy have made a muck of the enterprise while state policy making has all but disappeared. The victim of weak imaginations, insufficient funding, and an aversion to targeted investment. Chapter by chapter, this compelling text draws on new data developed by the authors in a Gates Foundation funded project to describe the landscape: how the market for higher education distributes students among competing institutions; what the job market is looking for; how markets differ across the fifty states; and how the higher education market determines the kinds of faculty at different kinds of institutions. The volume concludes with a three-pronged set of policies for making American higher education mission-centered as well as market-smart. Although there is no one-size-fits-all approach for reforming higher education, this clearly written book will productively advance understanding of the challenges colleges and universities face by providing a mapping of the configuration of the market for an undergraduate education. *The Fiske Guide to Getting into the Right College* Edward B Fiske, Bruce G Hammond, 2007-07-01 Find the college that's right for you. Tuition Rising Ronald G. Ehrenberg, 2009-07-01 America's colleges and universities are the best in the world They are also the most expensive Tuition has risen faster than the rate of inflation for the past thirty years There is no indication that this trend will abate Ronald G Ehrenberg explores the causes of this tuition inflation drawing on his many years as a teacher and researcher of the economics of higher education and as a senior administrator at Cornell University Using incidents and examples from his own experience he discusses a wide range of topics including endowment policies admissions and financial aid policies the funding of research tenure and the end of mandatory retirement information technology libraries and distance learning student housing and intercollegiate athletics He shows that colleges and universities having multiple relatively independent constituencies suffer from ineffective central control of their costs And in a fascinating analysis of their response to the ratings published by magazines such as U S News World Report he shows how they engage in a dysfunctional competition for students In the short run colleges and

universities have little need to worry about rising tuitions since the number of qualified students applying for entrance is rising even faster. But in the long run it is not at all clear that the increases can be sustained. Ehrenberg concludes by proposing a set of policies to slow the institutions' rising tuitions without damaging their quality.
