General Introduction

Standard Motor Products, Inc. Greenville Operations (SMP) is a registered TS-16949 facility. SMP has earned a reputation for providing products of consistent quality, competitive prices and flexible production scheduling capacity. Our ability to maintain this reputation greatly depends on the quality of the production materials purchased from our suppliers. For this reason, SMP considers its suppliers valuable assets for the achievement of quality objectives.

Suppliers with short lead times, competitive prices and flexible shipping abilities enable SMP to offer customers the dynamic partnership they have come to expect. Through long term, constructive relationships with suppliers, SMP continuously looks for opportunities to improve the flow of material and information, and ultimately to reduce costs and lead times. Suppliers to SMP must have a commitment to product quality and an understanding of the associated cost of poor quality when delivered to customers.

Our goal is to work closely with both new and existing suppliers to ensure that the quality level of products and services provided by each supplier meet Standard Motor Products, Inc. specifications, requirements, expectations, and satisfaction.

We have set our supplier goals to zero defects and 100% on time delivery, and with cooperation and open communication with our suppliers, we can achieve these goals. COMMENTS FROM OTHER CUSTOMERS

Average Customer Rating 5 of 5 based on 4 reviews

This book offers me the information I need to upgrade the quality of the service I provide to customers It makes the quantum leap between the theory and practice in calibration I needed this applicable and practical information a long time ago

A reader in Anchorage Alaska This book is a great and simple reference guide for developing a world class calibration system If you are thinking about revamping your calibration system or developing one this book is a must This book is written by a person sharing his practical experience to less experienced people

A reader in Austin Texas Excellent reference for setting up a calibration program or improving your current operations This book is a must read for anyone working in the metrology field

A reader in Springboro Ohio This book is for anyone who wants to learn more about the requirements of a good calibration program It gives easy to understand guidelines and practical advice to help you make your calibration program world class

A reader in Putnam Connecticut Total Quality Measurement in the Oil Industry J.D. Symonds, 2012-12-06 1 Oxford and Webster's dictionaries 2 give trans Atlantic agreement in English with a common definition for Quality as degree of excellence Compared with the many words taken up by other authors definitions this is remarkably brief and no doubt unsatisfactory to many people Yet if degree means a stage in an ascending or descending series in intensity or in amount then measurement is by definition explicitly required if terms such as quality level good quality high quality etc are to have any real meaning Using measurement is inherent in the methods of all the major writers on the achievement of business improvement through quality Results from measurements allow improvement by using tools commonly grouped under the heading Statistical Process Control SPC Results also form part of the judging criteria of Total Quality Management TQM models such as the Malcolm Baldrige National Quality Award in the USA and the more recent European Quality Award

Future revisions of the ISO 9000 series of quality management system standards will specifically require measurement of defects. However, it is not easy for quality professionals or line managers to find examples of what they should measure and how to do it in their own particular functions in their own particular industries. Case studies always seem to refer to others.
