

**GORDIS EPIDEMIOLOGY 6TH EDITION TEST BANK
COMPLETE 2023 - 2024**

1. Which of the following is an example of tertiary prevention?
- a. Vaccination for rotavirus for children younger than the age of 1 year
 - b. Surgical amputation of an extremity with osteosarcoma (bone cancer)
 - c. Screening for gestational diabetes after 24 weeks of pregnancy
 - d. Sexual education program in elementary schools
 - e. Increasing taxes for buying cigarettes

ANS: B

Surgical amputation of an extremity with osteosarcoma (bone cancer) is an example in which when a disease is present the treatment (amputation) is done to reduce the impact of disease by preventing the tumor from dissemination. Vaccination for rotavirus for children younger than the age of 1 year, sexual education program in elementary schools, and increasing taxes for buying cigarettes represent examples of primary prevention. Screening for gestational diabetes after 24 weeks of pregnancy is an example of secondary prevention.

2. This historic character observed was more common among women treated by physicians and medical students compared with women treated by midwives. Based on his observations, he implemented a hand wash policy that resulted in a decrease in mortality. Name the character that we are talking about.

- a. John Snow
- b. Edward Jenner
- c. D.A. Henderson
- d. Leon Gordis
- e. Ignaz Semmelweis

ANS: E

Ignaz Semmelweis identified that medical students and physicians transmitted the disease by not washing their hands after examining bodies at autopsies and conducting multiple examinations in the clinic.

3. Thanks to the contributions of Edward Jenner, the following disease was eradicated later by efforts organized by D.A. Henderson:

- a. Cholera
- b. Smallpox
- c. Chickenpox
- d. Polio
- e. Zika

Textbook of Epidemiology Lex Bouter,Maurice Zeegers,Tianjing Li,2023-01-04 **TEXTBOOK OF EPIDEMIOLOGY** The gold standard in epidemiological texts In the second edition of Textbook of Epidemiology a distinguished team of researchers deliver an extensively updated and comprehensive exploration of epidemiological methods illuminating the tools for studying the distribution and risk factors of health states and events in populations An introduction to epidemiological methods with recent and broadly applicable examples End of chapter self assessment questions for readers to check their understanding of key concepts with answer keys and further enrichment materials available on a companion website A brand new chapter covering methods for systematic review and meta analysis Accessible material appropriate for clinical practitioners and researchers from around the world Perfect for professionals working in clinical medicine and public health Textbook of Epidemiology will also earn a place in the libraries of allied health professionals seeking a one stop resource or to reimmerse themselves in specific methodological topics and practices **CPH Exam Quick Reference Review** Holmes

Larry,2010-10-25 In seven chapters youll get a complete review of each of the core competencies as recommended by the Association of Schools of Public Health ASPH as well as tips test taking skills recommended resources and 200 practice test multiple choice questions A concise review of epidemiology biostatistics behavioral and social sciences environmental sciences and health policy and management sciences is offered along with vignettes that illustrate the application of concepts Numerous figures tables and references further enhance learning **The Cleveland Clinic Cardiology Board Review** Brian P.

Griffin,Samir R. Kapadia,Venu Menon,2021-11-01 Providing a comprehensive state of the art review of every area of contemporary cardiovascular medicine The Cleveland Clinic Cardiology Review is an excellent tool for learning and reviewing key concepts in major areas of cardiology The ThirdEdition contains fully revised content review questions used on the board exam A new easy to follow chapter template facilitates quick review and retention of the material **Transfusion Medicine, Apheresis, and Hemostasis** Huy P. Pham,Lance A. Williams III,2017-09-15 Transfusion Medicine Apheresis and Hemostasis Review Questions and Case Studies is the collaborative effort that spanned a time period of 2 years and included

50 experts many whom are national leaders in their respected fields It also represents the passion and privilege we feel to teach the next generation of physicians in Transfusion Medicine and Apheresis The main goal for this book is to help the readers build a solid foundation of both basic and advanced conceptual knowledge to prepare for the American Board of Pathology ABP certification exam in Transfusion Medicine This book is not intended to be a substitute for textbooks original research or review articles and or clinical training Further since the field of medicine both from a scientific and regulatory perspective rapidly changes the readers are advised to continuously update their knowledge by attending national meetings and reading clinical journals To equip the readers with the basic knowledge in critical reading and data analysis which is an essential skill in daily medical practice a novel chapter titled Data Interpretation in Laboratory Medicine was included in this book In this chapter the readers are asked to make logical conclusions based on the given data and or statistical results Moreover there is also a chapter on Practical Calculations in Transfusion Medicine Apheresis and Hemostasis to help consolidate all the necessary formulas commonly used in daily practice for easy reference These chapters are unique to our book and will not be found in any other currently on the market All of the questions in this book were originally created by the authors of each chapter Each question can either be standalone or part of a case scenario representing challenge cases in Transfusion Medicine Apheresis and Hemostasis These questions often represent both rare and common clinical scenarios that the authors have seen during their clinical practice Each question is then followed by 5 possible answers with only one being correct or the best answer After the question there is a conceptual explanation followed by a more factual explanation of the right and wrong answers We gave the individual authors the freedom to choose how they explained the wrong answer choices Some authors chose to be more direct e g Answer A is incorrect because while other authors chose a more conversational style e g Human resources answer A includes staffing selection orientation training and competency assessment of employees This format is designed to help the student linking the conceptual and factual knowledge together to form a solid foundation for use in clinical practice At the end of each chapter there is a list of articles and textbooks that will prove useful to the motivated student who wishes to become an expert in the field Another special feature to our textbook is the presence of a pre test and post test which are provided to help the readers with self assessment As stated above the main focus of this book is to help the readers preparing for the ABP certification exam in Transfusion Medicine However due to the interdisciplinary nature of the field of Transfusion Medicine Apheresis and Hemostasis we believe that this book is also beneficial to and can be used by all clinicians involved in the management of complex transfusion apheresis and hemostasis issues such as hematologists anesthesiologists surgeons and critical care physicians We further believe that it is a helpful guide for these specialists to prepare for their own specialty certification exam when the topics are related to Transfusion Medicine Apheresis and Hemostasis
