Johannes Jäger, Elisabeth Springler

Grade 1geography Memorandum For Paperfor 2013:

The Routledge Companion to Bourdieu's 'Distinction' Philippe Coulangeon, Julien Duval, 2014-10-30 This edited collection explores the genesis of Bourdieu's classical book *Distinction* and its international career in contemporary Social Sciences. It includes contributions from contemporary sociologists from diverse countries who question the theoretical legacy of this book in various fields and national contexts. Invited authors review and exemplify current controversies concerning the theses promoted in *Distinction* in the sociology of culture, lifestyles, social classes and stratification, with a specific attention dedicated to the emerging forms of cultural capital and the logics of distinction that occur in relation to material consumption or bodily practices. They also empirically illustrate the theoretical contribution of *Distinction* in relation with such notions as field or habitus, which fruitfulness is emphasized in relation with some methodological innovations of the book. In this respect, a special focus is put on the emerging stream of distinction studies and on the opportunities offered by the geometrical data analysis of social spaces.

Automobility and the City in Twentieth-Century Britain and Japan

Simon Gunn, Susan C. Townsend, 2019-08-22 *Automobility and the City in Twentieth Century Britain and Japan* is the first book to consider how mass motorization reshaped cities in Japan and Britain during the 20th century. Taking two leading motor cities, Nagoya and Birmingham, as their principal subjects, Simon Gunn and Susan C. Townsend show how cars changed the spatial form and individual experience of the modern city and reveal the similarities and differences between Japan and Britain in adapting to the motor age. The book has three main themes: the place of automobility in post-war urban reconstruction; the emerging conflict between the promise of mobility and personal freedom offered by the car and its consequences for the urban environment; the M-E dilemma and the extent to which the Anglo-Japanese comparison can throw light on fundamental differences in cultural understanding of the environment, urbanism and the self. The result is the first comparative history of mass automobility and its environmental consequences between East and West.

Dead Tree Media Michael Stamm, 2018-10-16 A deep and timely account of how American newspapers were produced and distributed on paper. Winner of the Best Book in Canadian Business History by the Canadian Business History Association. Popular assessments of printed newspapers have become so grim that some have taken to calling them dead tree media as a way of invoking the medium's imminent demise. There is a literal truth hidden in this dismissive expression: printed newspapers really are material goods made from trees. And throughout the twentieth century, the overwhelming majority of trees cut down in the service of printing newspapers in the United States came from Canada. In *Dead Tree Media*, Michael Stamm reveals the international history of the commodity chains connecting Canadian trees and US readers. Drawing on newly available corporate documents and research in archives across North America, Stamm offers a sophisticated rethinking of the material history of the printed newspaper. Tracing its industrial production from the forest to the newsstand, he provides an account of the obscure and often hidden labor involved in this manufacturing process by showing how it was driven by not only

publishers and journalists but also lumberjacks paper mill workers policymakers chemists and urban and regional planners Stamm describes the 1911 shift in tariff policy that gave US publishers duty free access to Canadian newsprint providing a tremendous boost to Canadian paper manufacturers and a significant subsidy to American newspaper publishers He also explains how Canada attracted massive American foreign investment in paper mills around the same time that US publishers were able to gain greater access to Canada's vast spruce forests Focusing particularly on the Chicago Tribune Stamm provides a new history of the rise and fall of both the mass circulation printed newspaper and the particular kind of corporation in the newspaper business that had shaped many aspects of the cultural political and even physical landscape of North America For those seeking to understand the travails of the contemporary newspaper business *Dead Tree Media* is essential reading

Asymmetric Crisis in Europe and Possible Futures Johannes

Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics
