Undemocratic Jay Sekulow,2016-02-02 Updated with two new chapters Cover Hard Target Stephan Haggard,Marcus Noland,2017-05-30 Because authoritarian regimes like North Korea can impose the costs of sanctions on their citizens these regimes constitute hard targets Yet authoritarian regimes may also be immune and even hostile to economic inducements if such inducements imply reform and opening This book captures the effects of sanctions and inducements on North Korea and provides a detailed reconstruction of the role of economic incentives in the bargaining around the country s nuclear program Stephan Haggard and Marcus Noland draw on an array of evidence to show the reluctance of the North Korean leadership to weaken its grip on foreign economic activity They argue that inducements have limited effect on the regime and instead urge policymakers to think in terms of gradual strategies Hard Target connects economic statecraft to the marketization process to understand North Korea and addresses a larger debate over the merits and demerits of engagement with adversaries **Global Human Resource Development** Thomas N. Garavan,Alma M.

McCarthy,Michael J. Morley,2016-02-05 Drawing on contributions from leading academics in the field this volume within the

Routledge Series in Human Resource Development specifically focuses on Global Human Resource Development HRD. Specifically the volume provides an overview of 17 regions 85 countries and includes one emerging market grouping CIVETS. This book examines the role of the state in HRD the relationship between HRD and the level of economic development in the country or region the influence of foreign direct investment within the country or region and firm level HRD practices within countries or regions. Global Human Resource Development analyzes HRD from institutional and cross cultural perspectives making it possible for the first time to analyze trends across countries and regions and to draw conclusions about the value of institutional and cross cultural perspectives in the HRD context. There is currently no book on the market that conceptualizes the discipline of global HRD in this way making this a definitive book on HRD across the globe of particular interest to researchers and reflective practitioners.

Modern Philippines Patricio N. Abinales, 2022-07-08 This comprehensive thematic encyclopedia focuses on the Philippines and explores the geography history and society of this important island nation. The Philippines is a nation that has experience being ruled by two separate colonial powers home to a people who have had strong attachments to democratic politics with a culture that is a rich mix of Chinese Spanish and American influences. What are some important characteristics of contemporary daily life and culture in the Philippines today? Thematic chapters examine topics such as government and politics history food etiquette education gender marriage and sexuality media and popular culture music art and more. Each chapter opens with a general overview of the topic and is followed by alphabetically arranged entries that hone in even closer on the topic. Sidebars and illustrations appear throughout the text and appendixes cover a glossary facts and figures holidays chart and vignettes that paint a picture of a typical Day in the Life.

Data Mining and Exploration Chong Ho Alex Yu, 2022-10-27 This book introduces both conceptual and procedural aspects of cutting edge data science methods such as dynamic data visualization artificial neural networks ensemble methods and text mining. There are at least two unique elements that can set the book apart from its rivals. First most students in social sciences engineering and business took at least one class in introductory statistics before learning data science. However usually these courses do not discuss the similarities and differences between traditional statistics and modern data science as a result learners are disoriented by this seemingly drastic paradigm shift. In reaction some traditionalists reject data science altogether while some beginning data analysts employ data mining tools as a black box without a comprehensive view of the foundational differences between traditional and modern methods e.g. dichotomous thinking vs pattern recognition confirmation vs exploration single method vs triangulation single sample vs cross validation etc. This book delineates the transition between classical methods and data science e.g. from p value to Log Worth from

resampling to ensemble methods from content analysis to text mining etc Second this book aims to widen the learner's horizon by covering a plethora of software tools When a technician has a hammer every problem seems to be a nail By the same token many textbooks focus on a single software package only and consequently the learner tends to fit the problem with the tool but not the other way around To rectify the situation a competent analyst should be equipped with a tool set rather than a single tool For example when the analyst works with crucial data in a highly regulated industry such as pharmaceutical and banking commercial software modules e.g. SAS are indispensable For a mid size and small company open source packages such as Python would come in handy If the research goal is to create an executive summary quickly the logical choice is rapid model comparison If the analyst would like to explore the data by asking what if questions then dynamic graphing in JMP Pro is a better option This book uses concrete examples to explain the pros and cons of various software applications

Schooled and Sorted Thurston Domina, Andrew M. Penner, Emily K. Penner, 2023-06-22 We tend to view education primarily as a way to teach students skills and knowledge that they will draw upon as they move into their adult lives However schools do more than educate students they also place students into categories such as kindergartner English language learner or honor roll student In *Schooled and Sorted* Thurston Domina Andrew M Penner and Emily K Penner explore processes of educational categorization in order to explain the complex relationship between education and social inequality and to identify strategies that can help build more just educational systems Some educational categories have broadly egalitarian consequences Indeed Domina Penner and Penner argue that when societies enroll young people in school making them students they mark them as individuals who are worthy of rights But other educational categories reinforce powerful social categories including race gender and class and ultimately reproduce social and economic inequality in society Elite colleges tracked high schools and elementary school gifted programs provide not only different educational experiences but also create merit and inequality by sorting students into categories that are defined by the students who are excluded *Schooled and Sorted* highlights that many of the decisions that define educational categories occur in school based committee meetings and other relatively local settings The local nature of these decisions provides many opportunities to define educational categories differently and for school communities to bring about change *Schooled and Sorted* is an illuminating investigation into the ways sorting within schools translates into inequality in the larger world While some educational categorization may be unavoidable the authors suggest ways to build a more equitable system and thus a more equitable society
