International Handbook of Mathematical Learning Difficulties Annemarie Fritz,Vitor Geraldi Haase,Pekka Räsänen,2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there is still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it is time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society **The Parliamentary Debates (Hansard)**. The Promise and Practice of University Teacher Education Alexandra C. Gunn,Mary F. Hill,David A. G. Berg,Mavis Haigh,2020-10-01 Centering on the theme of university based teacher education at a time of system change and its connections with broader global political issues this book investigates the changing nature of initial teacher education ITE as it amalgamated into universities in the New Zealand context The New Zealand government like many across the world is seeking improvement in education system performance with a particular interest in meeting the needs of those traditionally

disadvantaged through education As a result over the last 20 years most ITE has been relocated into universities and teacher qualifications have changed Not immune to international discourses about the criticality of the teacher workforce to system performance Aotearoa New Zealand provides a bounded yet connected case of ITE development and reform The authors draw from a study of teacher education practice in Aotearoa New Zealand and also look at recent research carried out in other jurisdictions to consider how ITE and the academic category of teacher educator is constructed maintained and practiced within the institution of the university They highlight the promise of university based ITE provision noting areas for development and provide an opportunity to better understand how student teachers within ITE respond to and engage with teacher educators work in the service of their own learning

Research Joanna Baumgart, 2021-11-29 In this book Joanna Baumgart offers a detailed and innovative account of how a mixed methods approach combining corpus linguistics and discourse analysis can shed light on educational practice Corpus Linguistics and Cross Disciplinary Action Research is based on a 22 000 word corpus of mathematics lessons in a multicultural secondary school in Ireland with the analysis of classroom data supported by insights from reflective meetings with the participating teacher It demonstrates how examination of video recordings of lessons and reflective conversations facilitate discursive changes in the classroom and increase teacher awareness of classroom interaction Throughout the role of teacher talk is used as a model in the subject specific discourse into which students are socialized Baumgart also relates the story of a successful interdisciplinary approach to action research thereby providing an example of how talk and interaction can be examined within wider educational contexts Building on the premise of the key role which language and talk in particular plays in teaching and learning processes this book will be of keen interest to teacher educators as well as researchers in the fields of corpus linguistics discourse analysis and educational linguistics
