Portin, Lynn G. Beck, Michael Knapp, Joseph Murphy, 2003-02-28 The primary purpose of this study is to learn from the experiences of schools across the U S that are engaged in a largely process oriented reform strategy Schools vary in their capacity for productive self reflection The authors examine the process of self assessment that many schools engaged in during this time of widespread public attention to the equality of schools The schools examined in these cases reveal a complex interaction between the nature of the self reflective activity the schools were engaged in in this case a National Education Association school review process entitled KEYS to Success in Schools the contexts that shape the school and the readiness on the part of school staff to engage in systematic reflection around issues that affect teaching and learning The act of self reflection in schools may not provide by itself a source of new ideas alternative models and a sense of what might be possible for the school to accomplish Some external agent can often provide the impetus for or constrain the actions of school staffs in examining their programs and capacity for renewal The acts and outcomes of self reflection are inevitably guided and or constrained by various contexts including the

school's history, culture, structure, and supports and pressures provided from communities, districts, and states. **Emergent Bilingual Students and Their Academic Performance** John R. Slate, Clare A. Resilla, 2023-09-07 Emergent Bilinguals, formerly known as English Language Learners, are one of the fastest growing subgroups in the United States. Their educational needs are not well met by the educational system. In this book, we report results of empirical multiyear studies about their reading and mathematics performance both at the elementary school and high school levels. Given that state education agencies collect enormous amounts of information that are typically not well analyzed, this book serves as an exemplar of secondary data analyses. Educational leaders, educational researchers, and legislators and policymakers will find the chapters in this book useful. Findings from these statewide analyses can provide readers with baselines of the performance of Emergent Bilingual students prior to the Covid-19 pandemic in reading and in mathematics. Changes in instructional practices and in educational programming could be made based upon the numerous statistical results present in this book. **School Accountability** Williamson M. Evers, Herbert J. Walberg, 2002 Scholars from history, economics, political science, and psychology describe the present state of school accountability, how it evolved, how it succeeded and failed, and how it can be improved. They review the history behind the ongoing conflict between educators and policymakers over accountability and testing, describe various accountability schemes, and analyze the costs of accountability. Case studies of three states with strong school systems compare how accountability works in practice. Evers is a research fellow at the Hoover Institution.
