Spirit and Soul Peter Mokhatas,2016-09-08 By all accounts Dr Jonathan Isaac Holt lived a terrific life He was a distinguished professor and best selling author was greatly respected in his field and was blessed with a wife and a child However under the surface a cauldron of emotions stirred within him Years before he walked away from his true love leaving him detached from the accomplishments that otherwise surrounded him This detachment had a profound effect on his family leaving Brenda his wife and Jean Louise his daughter to wonder what had become of their family Tragedy struck when an accident took Brenda and Jean Louises lives shattering any semblance of happiness that remained within him While enduring immense grief unfamiliarity and longing for his lost past he entered a deep state When he emerged he found himself somewhere he had never been before Standing before him was Dante Alighieri the supreme poet Dante reveals to Dr Holt that he will be taking him on a spiritual pursuit in heaven reversing his role from Divina Commedia to become the attendant for Dr Holts sojourn Spirit and Soul A Journey tells the story of Dr Holts past seen through multiple points of view as it has brought him to the point he is at today and intertwining with revelations about the very nature of existence both in the physical and spiritual worlds Dr Holt will be learning about lifes deep seated mysteries among them the nature of love sin free will religion faith the Holy Spirit and the meaning of life

Treatise on Heavy-Ion Science D.A. Bromley,2012-11-27 For 75 years the stopping of energetic ions in matter has been a subject of great theoretical and experimental interest The theoretical treatment of the stopping of ions in matter is largely due to the work of Bohr 1 3 Bethe 4 6 Bloch 7 s and Lindhard 9 12 and it has been reviewed by Bohr 3 Fano 13 17 20 Jackson 14 Sigmund 15 Ahlen 16 and Ziegler et al Soon after the discovery of energetic particle emission from radioactive materials there was interest in how these corpuscles were slowed down in traversing matter In 1900 Marie Curie stated 21 the hypothesis that Hies rayons alpha sont des projectiles materiels susceptibles de perdre de leur vitesse en travers ant la

matiere Early attempts to evaluate this were inconclusive for there was not yet an accurate proposed model of the atom. Enough experimental evidence was collected in the next decade to make stopping power theory one of the central concerns of those attempting to develop an atomic model. J. J. Thomson, director of the prestigious Cavendish Laboratory, and Niels Bohr, a fresh postdoctoral scientist at Rutherford's Manchester Laboratory, both published almost simultaneously^{22, 23} an analysis of the stopping of charged particles by matter, and each contained many of their divergent ideas on the model of an atom. Thomson ignored in his paper the Rutherford alpha particle scattering²⁴ experiment of a year before. But the nuclear atom with a heavy positively²⁵ charged core was the basis of Bohr's ideas.
