**Solving Modern Problems With a Stone-Age Brain** Douglas T. Kenrick, David E. Lundberg-Kenrick, 2022-05-17 Like our ancestors we must do our best to survive form friendships win respect attract mates and care for our families In the 21st century however the threats to our survival are sometimes hidden This book presents evolutionary science based advice for fending off our modern attackers and learning how to be happy in the modern world [Your Stone Age Brain in the Screen Age](#) Richard E. Cytowic, 2024-10-01 An award winning neurologist on the Stone Age roots of our screen addictions and what to do about them The human brain hasn't changed much since the Stone Age let alone in the mere thirty years of the Screen Age That's why according to neurologist Richard Cytowic who Oliver Sacks observed changed the way we think of the human brain our brains are so poorly equipped to resist the incursions of Big Tech They are programmed for the wildly different needs of a prehistoric world In [Your Stone Age Brain in the Screen Age](#) Cytowic explains exactly how this programming works from the brain's point of view What he reveals in this book shows why we are easily addicted to screen devices why young developing brains are particularly vulnerable why we need silence and what we can do to push back In the engaging storytelling style of his popular TED Talk Cytowic draws an easily comprehensible picture of the Stone Age brain's workings the function of neurotransmitters like dopamine in basic instincts for survival such as desire and reward the role of comparison in emotion and emotion in competition and most significantly the orienting reflex one of the unconscious circuits that automatically focus shift and sustain attention Given this picture the nature of our susceptibility to digital devices becomes clear along with the possibility of how to break their spell Full of practical actions that we can start taking right away [Your Stone Age Brain in the Screen Age](#) offers compelling evidence that we can change the way we use technology resist its addictive power over us and take back the control we have lost **Adventures in the Stone Age** Leopold Jaroslav Pospíšil, 2021-11-01 When Leopold Pospíšil first arrived in New Guinea in 1954 to investigate the legal systems of the local tribes he was warned about the Kapauku who reputedly had no laws Dubious that any society could exist without laws Pospíšil immediately decided to live among and study the Kapauku Learning the language and living as a participant observer among the Kapauku Pospíšil discovers that the supposedly primitive society possesses laws rules and social structures that are as sophisticated as they are logical Having survived the Nazi occupation of Czechoslovakia and fled the Communist regime Pospíšil has little patience for the notion that so called advanced civilizations are superior to the stone age society in which he now lives On the basis of his research and experiences among the Kapauku he would stay with them five times between 1954 and 1979 Pospíšil pioneered in the field of legal anthropology holding a professorship at Yale serving as the anthropology curator of the Peabody Museum of Natural History and publishing three books of scholarship on the Kapauku law As Jaroslav Jílek and Martin Soukup write in their afterword however His three previously published works are about the Kapauku this one is about the anthropologist among the Kapauku The memoir is filled with charming anecdotes and thrilling stories of trials

travels and war told with humor and humility and accompanied by a wealth of the author's personal photos from the time

**Space-Age Science and Stone-Age Politics** John Scales Avery, 2016-02-07 Space age science and stone age politics make an extraordinarily dangerous mixture. It seems probable that in the future the rapidity of scientific and technological change will produce ethical dilemmas and social tensions even more acute than those we experience today. It is likely that the fate of our species and the fate of the biosphere will be made precarious by the astonishing speed of scientific and technological change unless this progress is matched by the achievement of far greater ethical and political maturity than we have yet attained. *Political Organization in Nigeria since the Late Stone Age* J. Oriji, 2011-01-17 Although the Igbo

constitute one of the largest ethnic nationalities of Nigeria and the West African sub region little is known about their political history before the Trans Atlantic slave trade. This book is a pioneer study of the broad changes Igbo political systems have undergone since the prehistoric period. **Living in the Stone Age** Danilyn Rutherford, 2018-10-24 In 1961 John F

Kennedy referred to the Papuans as living as it were in the Stone Age. For the most part politicians and scholars have since learned not to call people primitive but when it comes to the Papuans the Stone Age stain persists and for decades has been used to justify denying their basic rights. Why has this fantasy held such a tight grip on the imagination of journalists policy makers and the public at large? *Living in the Stone Age* answers this question by following the adventures of officials sent to the New Guinea highlands in the 1930s to establish a foothold for Dutch colonialism. These officials became deeply dependent on the good graces of their would be Papuan subjects who were their hosts guides and in some cases friends. Danilyn Rutherford shows how to preserve their sense of racial superiority these officials imagined that they were traveling in the Stone Age a parallel reality where their own impotence was a reasonable response to otherworldly conditions rather than a sign of ignorance or weakness. Thus Rutherford shows was born a colonialist ideology. *Living in the Stone Age* is a call to write the history of colonialism differently as a tale of weakness not strength. It will change the way readers think about cultural contact colonial fantasies of domination and the role of anthropology in the postcolonial world. Politics and

History in Band Societies Richard Lee, 1982-09-30 The papers collected in this volume present important information on the history and culture of contemporary gathering and hunting peoples from Canada India Africa Australia and the Philippines. The volume focuses on two themes first on the techniques which band living foraging peoples employ to organise their social and economic lives and second on their fight for the right to their own lands and for a measure of cultural and political autonomy. The contributors maintain that gatherer hunters are not examples of a disappearing way of life but peoples who have maintained their social and economic practices through long periods of contact with stratified societies. The aim of this volume is to make known to as wide an audience as possible the daily lives the patterns of relations between the sexes and the political orientations of the world's contemporary foragers. *The Universal Pattern Within History* Rachamim

Dayan, 2002-09-23 This book is a work of synthesis which argues that an all encompassing blueprint governs the evolution of

all parts of our universe In its first half it discerns interdisciplinary symmetry in the early development of history and six other disciplines It then uses this discovery to formulate testable predictions about the form and content of later history In its second half the book attempts to verify these intimations of our more recent past and to envision the human future that lies ahead

From 'Stone-Age' to 'Real-Time' Martin Slama, Jenny Munro, 2015-04-24

There are probably no other people on earth to whom the image of the stone age is so persistently attached than the inhabitants of the island of New Guinea which is divided into independent Papua New Guinea and the western part of the island known today as Papua and West Papua

From Stone Age to Real Time examines the forms of agency frictions and anxieties the current moment generates in West Papua where the persistent stone age image meets the practices and ideologies of the real time a popular expression referring to immediate digital communication

The volume is thus essentially occupied with discourses of time and space and how they inform questions of hierarchy and possibilities for equality

Papuans are increasingly mobile and seeking to rework inherited ideas institutions and technologies while also coming up against palpable limits on what can be imagined or achieved secured or defended

This volume investigates some of these trajectories for the cultural logics and social or political structures that shape them

The chapters are highly ethnographic based on in depth research conducted in diverse spaces within and beyond Papua

These contributions explore topics ranging from hip hop to HIV AIDS to historicity filling much needed conceptual and ethnographic lacunae in the study of West Papua
