This important book evaluates Web sites for content clarity and user-friendliness and shows you how to conduct a focused, subject-specific search. From editor M. Sandra Wood. It is well known that men are less likely than women to seek health care. Information resources on the Internet relating to health issues, from Web sites to newsletters to chat groups, are abundant. Some are much more reliable than others, and there is just as much variety when it comes to ease of use.
