Home Delivery Barry Bergdoll, Peter Christensen, 2008 Edited by Barry Bergdoll Peter Christensen Texts by Barry Bergdoll Peter Christensen Ken Tadashi Oshima Rasmus Waen *A Cultural History of Furniture in the Age of Empire and Industry* Catherine L. Fetter, Christina M. Anderson, 2022-02-24 The 19th century in Western culture was a time of both confidence and turbulence Industrial developments resulted in a number of benefits from a growing middle class to efficiency convenience and innovation across a range of fields from engineering to architecture Alongside these improvements the century began with the extended period of the Napoleonic Wars and was further disrupted by rebellions and revolutions both within Europe and in India South America and other parts of the world Slavery was abolished and urbanization increased dramatically These myriad developments were reflected throughout the period in the proliferation of types of furniture along with their categorization as industrial art at the international exhibitions and world fairs and the increasingly adventurous range of materials that were sometimes used in their construction Nonetheless a strong antiquarian historicist strand also prompted interest in the revival of past styles in areas of art and design including furniture Drawing upon a wealth of visual and textual sources this volume presents essays that examine key characteristics of the furniture of the period on the themes of Design and Motifs Makers Making and Materials Types and Uses The Domestic Setting The Public Setting Exhibition and Display Furniture and Architecture Visual Representations and Verbal Representations *The SAGE Handbook of Architectural Theory* C. Greig Crysler, Stephen Cairns, Hilde Heynen, 2012-01-10 The SAGE Handbook of Architectural Theory documents and builds upon some of the most innovative developments in architectural theory over the last two decades Bringing into dialogue a range of geographically institutionally and historically competing positions the book examines and explores parallel debates in related fields The book is divided into eight sections Power Difference Embodiment Aesthetics Pleasure Excess Nation Spectacle Modernity History Memory Tradition Design Practice Production Technology Science Virtuality Nature Landscape Sustainability City Metropolis Territory Creating openings for future lines of inquiry and establishing the basis for new directions for education research and practice the book organizes itself around specific case studies to provide a critical interpretive and speculative enquiry into the relevant debates in architectural theory A methodical authoritative and comprehensive addition to the literature the Handbook is suitable for academics researchers and practitioners in architecture urban geography cultural studies sociology and geography **Atomic Dwelling** Robin Schuldenfrei, 2012-08-21 In the years of reconstruction and economic boom that followed the Second World War the domestic sphere encountered new expectations regarding social behaviour modes of living and forms of dwelling This book brings together an international group of scholars from architecture design urban planning and interior design to reappraise mid twentieth century modern life offering a timely reassessment of culture and the economic and political effects on civilian life This collection contains essays that examine the material of art objects and spaces in the context of practices of dwelling over

the long span of the postwar period It asks what role material objects interior spaces and architecture played in quelling or fanning the anxieties of modernism s ordinary denizens and how this role informs their legacy today *BC AD (English edition). Bentham Crouwel 1979-2009 ,2010* Global Heritage Assemblages Christoph Rausch,2016-11-25 UNESCO aims to tackle Africa s under representation on its World Heritage List by inscribing instances of nineteenth and twentieth century modern architecture and urban planning there But what is one to make of the utopias of progress and development for which these buildings and sites stand After all concern for modern heritage invariably and paradoxically it seems has to reckon with those utopias as problematic futures of the past a circumstance complicating intentions to preserve a recent culture of modernization on the African continent This book a new title in Routledge s Studies in Culture and Development series introduces the concept of global heritage assemblages to analyse that problem Based on extensive anthropological fieldwork it describes how various governmental intergovernmental and non governmental actors engage with colonial and post colonial built heritage found in Eritrea Tanzania Niger and the Republic of the Congo Rausch argues that the global heritage assemblages emerging from those examples produce problematizations of the modern which ultimately indicate a contemporary need to rescue modernity from its dominant conception as an all encompassing epochal and spatial culture

Binding Space: The Book as Spatial Practice Marian Macken,2018-04-17 Books orient intrigue provoke and direct the reader while editing interpreting encapsulating constructing and revealing architectural representation Binding Space The Book as Spatial Practice explores the role of the book form within the realm of architectural representation It proposes the book itself as another three dimensional complementary architectural representation with a generational and propositional role within the design process Artists books in particular that is a book made as an original work of art with an artist designer or architect as author have certain qualities and characteristics quite different from the conventional presentation and documentation of architecture Paginal sequentiality the structure and objecthood of the book and the act of reading create possibilities for the book as a site for architectural imagining and discourse In this way the form of the book affects how the architectural work is conceived constructed and read In five main sections Binding Space examines the relationships between the drawing the building and the book It proposes thinking through the book as a form of spatial practice one in which the book is cast as object outcome process and tool Through the book we read spatial practice anew Diversity among Architects Craig Wilkins,2016-03-10 Diversity among Architects presents a series of essays questioning the homogeneity of architecture practitioners who remain overwhelmingly male and Caucasian to help you create a field more representative of the population you serve The book is the collected work of author Craig L Wilkins an African American scholar and practitioner and discusses music education urban geography social justice community design centers race space identity shared landscape and many more topics **James Bond in World and Popular Culture** Jack Becker,Robert G. Weiner,B. Lynn Whitfield,2012-12-04 James Bond in World and Popular Culture The Films are Not Enough provides the most

comprehensive study of the James Bond phenomena ever published The 40 original essays provide new insights scholarship and understanding to the world of James Bond Topics include the Bond girl Bond related video games Ian Fleming's relationship with the notorious Aleister Crowley and CIA director Alan Dulles Other articles include Fleming as a character in modern fiction Bond Jr comics the post Fleming novels of John Gardner and Raymond Benson Bond as an American Superhero and studies on the music dance fashion and architecture in Bond films Woody Allen and Peter Sellers as James Bond are also considered as are Japanese imitation films from the 1960s the Britishness of Bond comparisons of Bond to Christian ideals movie posters and much more Scholars from a wide variety of disciplines have contributed a unique collection of perspectives on the world of James Bond and its history Despite the diversity of viewpoints the unifying factor is the James Bond mythos James Bond in World and Popular Culture The Films are Not Enough is a much needed contribution to Bond studies and shows how this cultural icon has changed the world *Modern in the Middle* Susan Benjamin, Michelangelo Sabatino, 2020-09-01

The first survey of the classic twentieth century houses that defined American Midwestern modernism Famed as the birthplace of that icon of twentieth century architecture the skyscraper Chicago also cultivated a more humble but no less consequential form of modernism the private residence *Modern in the Middle* Chicago Houses 1929-75 explores the substantial yet overlooked role that Chicago and its suburbs played in the development of the modern single family house in the twentieth century In a city often associated with the outsize reputations of Frank Lloyd Wright and Ludwig Mies van der Rohe the examples discussed in this generously illustrated book expand and enrich the story of the region's built environment Authors Susan Benjamin and Michelangelo Sabatino survey dozens of influential houses by architects whose contributions are ripe for reappraisal such as Paul Schweikher Harry Weese Keck Keck and William Pereira From the bold early example of the Battledeck House by Henry Dubin 1930 to John Vinci and Lawrence Kenny's gem the Freeark House 1975 the generation spanning residences discussed here reveal how these architects contended with climate and natural setting while negotiating the dominant influences of Wright and Mies They also reveal how residential clients typically middle class professionals progressive in their thinking helped to trailblaze modern architecture in America Though reflecting different approaches to site space structure and materials the examples in *Modern in the Middle* reveal an abundance of astonishing houses that have never been collected into one study until now **Long**

Island Moderns Kenneth Wayne, Erik Neil, Sandy Isenstadt, 2009 *Long Island Moderns* provides a new cultural narrative of Long Island in the 20th century Throughout the period important artists such as Lee Krasner Fernand Leger Irving Penn and Cindy Sherman lived and worked on the island Beginning in the late 1920s architects like Albert Frey Frank Lloyd Wright and Wallace Harrison built homes for themselves or their clients From the mid 1940s Long Island became home to works by Masters of Modernism like Philip Johnson and Marcel Breuer and new communities like Levittown changed the landscape
