Music and Story

Yiannis Grabriel, 2022-02-17 Music tells stories Musical stories entertain and stimulate in moments of boredom they offer solace in times of despair they create solidarity in times of loneliness they liberate the imagination and open up visions of a better future Musical stories also become parts of our personal life narratives that sustain feed us This book is about the stories that music tells and the beauty and emotional power of these stories This book is about the stories that music tells and the beauty and emotional power of these stories When successful these stories can provide dazzling insights into the lives that we lead with its joys and sufferings its reversals its errors deceptions and self deceptions This book offers a panorama of musical stories linked to pieces of classical music that have long fascinated the author including operas symphonies song cycles and chamber music A close reading of these stories shows how profoundly music can affect and change the listeners how it celebrates the triumphs of the human spirit opening windows into our own unconscious minds helping us to better understand ourselves our fellow human beings politics religion leadership sex difference love death and every other major aspect of human life Critical acclaim Imagine a friend who loved music and who would keep saying interesting things about the music they loved Their taste is not the same as yours but their comments and stories make you want to listen to some of their favourite music and also give you a different appreciation of the music that you love Then imagine that this friend's interesting comments were grounded in hours and years of intense listening that they had an unusual perspective to bring to the party music as story and that they said it all with grace and eloquence and with the light touch of a gossip column That is what this book is like Enjoy it and have your streaming device ready to explore David Sims Storyteller Musician Emeritus Professor of Organizational Behaviour City University In a world where commerce dictates the Arts it is a joy to read this book written with love and deep understanding as a heartfelt response to real music by my friend Yiannis a fellow traveller in search of musical truth Bruno Schrecker cellist with the Allegri String Quartet 1968 1999 This is a book for music lovers says Yiannis Gabriel The notion of love is crucial here Academic musicology however useful and insightful rarely if ever touches on the subjective experience of listening to music But to believe that music is an objective experience which can be adequately explained in scientific or quasi scientific terms or reduced to a socio political epiphenomenon is an illusion comforting to some perhaps but deadly when it comes to the individual's experience of

discovering and learning to love a musical work As with all things that matter to us we try to make sense of music not through factual analysis but by weaving stories in our imaginations This is both an intensely creative and an intensely personal experience As the philosopher Ernst Bloch put it When we listen to music what we really hear is ourselves Yiannis Gabriel's book is a highly personal account of his experience of music of the stories it has told to him and of the life experiences in which those stories have played a very positive part Far from being solipsistic or self indulgent far from telling us what we should hear when we listen to music it invites us to follow his example and find stories and meanings of our own within the musical works he loves best These are those for whom in Nietzsche's famous phrase Without music life would be a mistake On reading this book the conclusion we reach is that with music's help life is not a mistake but a creative adventure Stephen Johnson composer author musicologist This is a wonderful book about music Yiannis Gabriel's depth of knowledge and the infectious enthusiasm he has for the music he loves radiates through every chapter He makes you think about your own responses to music you already know and he is also a willing guide to music that may be less familiar He has listened carefully to more music than most of us both joyfully and seriously Read the book listen to the music go for a walk You will feel better for it Nigel Beaham Powell Composer and Subject Leader in Commercial Music Bath Spa University From the golden age of western classical listening Gabriel's eloquent voice reminds us how moving classical music can be Daniel Leech Wilkinson Emeritus Professor of Music King's College London
