				TEACHER	STUDENTS		
1	Vectors in three dimensions I	Students should be able to: (1) find dot or scalar product of vectors. (2) solve problems on dot products. (3) find the vector or cross product of two vectors.	(1) Scalar product of vectors in three dimensions. (2) Application of scalar product.	(1) Gives examples of vectors in three dimensions. (2) Guides students to find dot product of two vectors.	(1) Write out more examples of three dimensional vectors. (2) Solve problems on dot products of two vectors.	(1) Chart showing examples of three dimensional vectors. (2) Short cut method of finding dot product $\underline{a} \times \underline{b} = a_1b_2 - a_2b_1$ $\underline{a} \cdot \underline{b} = a_1b_1 + a_2b_2 + a_3b_3$	Students to: (1) find dot scalar product of vectors. (2) derive the formula $\underline{a} \times \underline{b} = a_1b_2 - a_2b_1$
2	Vectors in three dimensions II	Students should be able to: use cross product and solve problems on application of vectors problems.	Application of cross product	(1) Leads students to solve problems on application of dot product. (2) Solves some practical example on application of vector product.	(1) Solve problems of cross product of two vectors. (2) Solve problems on dot products. (3) Solve problems on cross products.	Recommended texts.	Students to: (1) find the vector product of given vector. (2) use matrices to find vector products of given vector. (3) solve problems on dot products.
3	Statistics (Probability)	Students should be able to: (1) state the frequentist, classical and axiomatic approach to probability. (2) define some terms used in probability. (3) solve problems on dependent and independent event.	(1) Classical frequentist and axiomatic approach to probability (2) Sample space and events space. (3) Mutually exclusive, independent and conditional event	(1) Leads students to evolve concept of classical and frequentist approach using inde die. (2) States axioms of probability $-P(E) \geq 0$ $-P(E) \leq 1$ (3) Defines mutual exclusive, independent and conditional events.	(1) Understand the classical frequent and axiomatic definition of probability. (2) Define some terms used in probability. (3) Solve sample problems on probability.	Recommended texts.	Students to: (1) explain frequentist classical and axiomatic approach to probability. (2) solve problems in independent event. -mutual exclusive events -conditional event -complement of an event.
4	Probability	Student should be able to: (1) solve problems on complements of events and conditional probability. (2) use tree diagram to solve probability questions.	(1) Conditional probability (2) Probability trees.	(1) Solves conditional probability. (2) Guides students to construct probability trees.	Solve problems on conditional tree (Probability).	(1) Ludo, dice coin, pack of cards. (2) Chart showing problem on probability tree.	Students to: (1) solve problem conditional probability. (2) construct probability tree.

Training to Teach in Primary Schools Jane Medwell, 2015-03-19 Full of practical help and guidance this is a must have for primary trainees on school experience whether they are in a school based or university based teacher training programme It begins by helping trainees to plan their own journey through training and beyond Taking control of their own training in this way supports student teachers to approach the course with confidence and secure their first teaching job The book provides guidance on adapting to working in school observing planning and evaluating in school teaching on placement assessing monitoring and reporting on children's progress self evaluation and

how to pre-empt and resolve issues securing the first teaching job and succeeding in the NQT year For student teachers the experience of school based training is exciting but also challenging this book supports them throughout and prepares them for the journey ahead Student feedback on this book Having been on a variety of teaching placements myself I know just how daunting and overwhelming experiences in school can be at times even with a supportive mentor by your side Hence I felt that this book can smooth out and rectify those worries one may face during a school placement and offers the reader a realistic insight into school experiences In my opinion the most useful chapter by far is the Moving On chapter near the end of the book This explains how to conclude a school placement what to expect from an interview and even how to set out a CV for a teaching position This was not something I expected to find in this book however it was very much welcomed and is in fact a very important valuable part of the book This is the type of book you can buy on your very first day of teacher training and use well into your days as a newly qualified teacher Jasmin Primary Teacher Trainee University of Northampton

Coordinating Mathematics Across the Primary School Tony Brown, 2003-10-04 Specifically designed for busy teachers who have responsibility for co-ordinating a subject area within their primary school Each volume in the series conforms to a concise style while providing a wealth of tips case studies and photocopiable material that teachers can use immediately There are special volumes dedicated to dealing with OFSTED creating whole school policy and the demands of co-ordinating several subjects within a small school The entire set of 16 volumes is available *Investing in Education: Combating Educational Disadvantage*, **Academies and Free Schools in England** Adrian Hilton, 2018-08-06 Academies and Free Schools in England argues that there is a high degree of philosophical consensus and historical continuity on the policy of academisation across the main political parties in England It attempts to make sense of what are all essentially free schools by interviewing the architects of policy and their closest advisors analysing the extent to which they invoke historical expressions of conservatism and or liberalism in their articulation of that convergence The book offers a unique insight into educational policy making during the Conservative Liberal Democrat coalition era 2010 2015 and an in depth analysis of the nature of liberty as it relates to state education in England Providing original interview transcripts of the key reformers and new accounts of a sometimes contentious history Hilton identifies an elite policy community connected by educational background moral religious frameworks life experiences and shared networks of common ideology Academies and Free Schools in England will be vital reading to academics and researchers in the field of education and education policy It will also be of great interest to school governors business leaders political philosophers and those involved and interested in free schools *Assessment and Examination in the Secondary School* Susan Butterfield, Richard Riding, 2003-09-02 This book explores current trends in assessment with particular reference to secondary schools as well as providing a background to theory and practice relevant to both new and established teachers **Primary School Management: Learning from Experience** Eric Briault, 2003-09-02 Issues raised include improving the quality of pupils learning experience effective staff

organisation development of policy and management of resources and establishing good relationships between the head the school and the community **Mathematical Aspects of Numerical Solution of Hyperbolic Systems** A.G.

Kulikovskii,N.V. Pogorelov,A. Yu. Semenov,2000-12-21 This important new book sets forth a comprehensive description of various mathematical aspects of problems originating in numerical solution of hyperbolic systems of partial differential equations The authors present the material in the context of the important mechanical applications of such systems including the Euler equations of gas dynamics magnetohydrodynamics MHD shallow water and solid dynamics equations This treatment provides for the first time in book form a collection of recipes for applying higher order non oscillatory shock capturing schemes to MHD modelling of physical phenomena The authors also address a number of original nonclassical problems such as shock wave propagation in rods and composite materials ionization fronts in plasma and electromagnetic shock waves in magnets They show that if a small scale higher order mathematical model results in oscillations of the discontinuity structure the variety of admissible discontinuities can exhibit disperse behavior including some with additional boundary conditions that do not follow from the hyperbolic conservation laws Nonclassical problems are accompanied by a multiple nonuniqueness of solutions The authors formulate several selection rules which in some cases easily allow a correct physically realizable choice This work systematizes methods for overcoming the difficulties inherent in the solution of hyperbolic systems Its unique focus on applications both traditional and new makes Mathematical Aspects of Numerical Solution of Hyperbolic Systems particularly valuable not only to those interested the development of numerical methods but to physicists and engineers who strive to solve increasingly complicated nonlinear equations Learning to Teach
