identify the rapist with the information from only one case Use of the physical characteristics of the criminal and the DNA must be used to tie cases together This is what the team of Mattie Greene the mathematics teacher and Sergeant Bill Simpson do in NOTTINGHAM HARBOR They find a common denominator between the cases with regard to the identity of the rapist Since rapists like other people must reside work eat and drink at physical places these types of information can be used to identify the specific person The techniques in the fictional story are the methods required in the real world to catch these dangerous criminals DNA will not catch but a few rapists There may be as many as 2000 rapists running around North America They rape randomly on the streets of this country and Canada The police and district attorneys in United States must work across jurisdictional lines as in NOTTINGHAM HARBOR Beside a good story the novel has a higher purpose It explains how to identify and catch these violent criminals The other fact about these criminals is some of them are murders in addition to being rapists If you are victim of a rape then you need to urge the local police to work with other jurisdictions and using technique similar those in NOTTINGHAM HARBOR identify and catch the rapist This is the purpose of the novel in addition to being a good story Enjoy the novel
