Geopolitics and Development Marcus Power, 2019-01-25 Geopolitics and Development examines the historical emergence of development as a form of governmentality from the end of empire to the Cold War and the War on Terror. It illustrates the various ways in which the meanings and relations of development as a discourse, an apparatus and an aspiration have been geopolitically imagined and enframed. The book traces some of the multiple historical associations between development and diplomacy and seeks to underline the centrality of questions of territory, security, statehood and sovereignty to the pursuit of development along with its enrolment in various ordering practices. In making a case for greater attention to the evolving nexus between geopolitics and development and with particular reference to Africa, the book explores the historical and contemporary geopolitics of foreign aid, the interconnections between development and counterinsurgency, the role of the state and social movements in reimagining development, the rise of re-emerging donors like China, India and Brazil and the growing significance of South-South flows of investment, trade and development cooperation. Drawing on post-colonial and postdevelopment approaches and on some of the author's own original empirical research, this is an essential critical and interdisciplinary analysis of the complex and dynamic political geographies of global development. Primarily intended for scholars and postgraduate students in development studies, human geography, African studies and international relations, this book provides an engaging, invaluable and up-to-date resource for making sense of the complex entanglement between geopolitics and development past and present.

Islamic Development in Palestine Stephen Royle, 2016-10-04 This book assesses the capabilities of an Islamic approach in aiding self-organisation by examining the case of the occupied Palestinian territories in conjunction with a comparative analysis of four other nations. Three main mechanisms of Islamic development are explored: finance, microfinance and charity. Identifying the need to recognise the non-linear nature of societal interaction at the individual, community and state levels, the book uses complexity theory to better understand development. It assesses the role of Islamic development at macro and micro levels and identifies issues with rigid and hierarchical policy making.
