Precision Strike Warfare and International Intervention Mike Aaronson, Wali Aslam, Tom Dyson, Regina Rauxloh, 2014-09-15 This book explores whether the new capabilities made possible by precision strike technologies are reshaping approaches to international intervention Since the end of the Cold War US technological superiority has led to a more proactive and some would argue high risk approach to international military intervention New technologies including the capacity to mount precision military strikes from high level bombing campaigns and more recently the selective targeting of individuals from unmanned aerial vehicles UAVs have facilitated air campaigns supported by Special Forces without the commitment of large numbers of troops on the ground Such campaigns include for example NATO's high level aerial bombardment of Milosevic's forces in Kosovo in 1999 and of Gaddafi's in Libya in 2011 and the US operation involving Special Forces against Osama Bin Laden The development of UAVs and electronic data intercept technologies has further expanded the potential scope of interventions for example against Islamic militants in the tribal areas of Pakistan This volume examines three key and interrelated dimensions of these new precision strike capabilities 1 the strategic and foreign policy drivers and consequences 2 the legal and moral implications of the new capabilities and 3 the implications for decision making at the strategic operational and tactical levels This book will be of much interest to students of war and technology air power international intervention security studies and IR

Governance in Transition Ján Buček, Andrew Ryder, 2015-04-15 This book looks at experience in government restructuring and devolution from a variety of national and international perspectives both within the European Union and elsewhere focusing on lessons learned and ways forward Since the 1980s there has been a global trend to give more power to local governments Even in Korea and the United Kingdom the most centralised countries in the OECD local government powers have increased with substantial economic benefits Within the European Union the principle of subsidiarity has enshrined the idea of devolution New member states particularly in central and eastern Europe have significantly created new and self sufficient local and regional governments However this process has been complicated Devolution is not a panacea in its own right and need not lead to economic growth While it can encourage savings through collaboration it can also lead to confused lines of authority and can complicate policy formation and implantation Devolution can strain local budgets forcing local governments to rely on their own sources of finance rather than central government

transfers Suburbanisation rural depopulation the growth of some regions and the decline of others have raised new problems particularly related to inter governmental cooperation among local governments and different levels of government In many cases an increased number of governments has increased administrative costs

Transatlantic Relations after the Russian-Ukrainian War Lorenzo Cladi, 2025-06-30 This book provides a neorealist explanation of transatlantic relations and explores key issues at the forefront of the relationship between the US and its European allies in the context of the Russia Ukraine war Transatlantic relations involving the relationship between the United States and its European counterparts are an essential feature and a cornerstone of the

foreign policy of many states Whilst the transatlantic allies share a relationship that has been in place since 1945 the re election of Donald J Trump as US President the continuing war between Russia and Ukraine and unsettled issues around European strategic autonomy all pose questions on the state of the partnership This book utilises a neorealist theoretical framework to tackle these questions It argues that transatlantic relations continue to prosper and European states remain dependent on the US for their security which is made viable and necessary by means of dealing with collective threats to the security of transatlantic allies of which the Russian invasion of Ukraine is the most obvious recent manifestation The book also deals with other notable case studies of transatlantic relations such as the French intervention in Mali and the US withdrawal from Afghanistan This book will be of interest to students of European security Foreign Policy and International Relations
