

- Q.1] a) Explain why a government might introduce subsidies for food.
- b) Discuss the impacts, specifically focussing on the negative consequences that may arise from the government's decision to subsidise food.

Answers (Time : 50 min)

A subsidy is a form of economic aid by the government to economic sectors, firms, individuals or consumers to provide them aid. Food qualifies as a primary product i.e. a product created by cultivating raw materials that does not require a manufacturing process.

The United States of America provided a subsidy to producers of corn, which has been depicted in the diagram beside.

The law of demand states that there is a negative causal relationship between the price and quantity demanded of a product. However, since ~~there~~

the introduction of so a subsidy is a non price factor, ~~there~~ there is a rightward shift in the supply curve. Owing to the law of demand, the ~~demand~~ quantity demand expands to the point.

The government may want to introduce subsidies

When Blame Backfires Anne Marie Baylouny,2020-09-15 The recent influx of Syrian refugees into Jordan and Lebanon has stimulated domestic political action against these countries governments This is the dramatic argument at the heart of Anne Marie Baylouny s *When Blame Backfires* Baylouny examines the effects on Jordan and Lebanon of hosting huge numbers of Syrian refugees How has the populace reacted to the real and perceived negative effects of the refugees In thought provoking analysis Baylouny shows how the demographic changes that result from mass immigration put stress on existing problems in these two countries worsening them to the point of affecting daily lives One might expect that as a result refugees and minorities would become the focus of citizen anger But as *When Blame Backfires* demonstrates this is not always the case What Baylouny exposes instead is that many of the problems that might be associated with refugees are in fact endemic to the normal routine of citizens lives The refugee crisis exacerbated an already dire situation rather than created it and Jordanians and Lebanese started to protest not only against the presence of refugees but against the incompetence and corruption of their own governments as well From small scale protests about goods and public services citizens progressed to organized and formal national movements calling for economic change and rights to public services not previously provided This dramatic shift in protest and political discontent was Baylouny shows the direct result of the arrival of Syrian refugees
