Few interventions are more central to modern medicine than the treatment of infection where antibiotics vaccination and hygienic practices have essential roles to play. The COVID 19 pandemic, the appearance of new pathogens and the rise of antibiotic resistance have demonstrated most completely the need for pharmaceutical practitioners, researchers and industrial scientists to be fully conversant with this field. The 9th edition of Hugo and Russell's *Pharmaceutical Microbiology* has been updated to meet this need. Having long served as the sole comprehensive textbook covering this subject, it has now been adapted to a critical new period in the advancement of medical and pharmaceutical research and development. Its experienced editors have incorporated contributions from subject experts and created a text which will serve the next generation of pharmacy students, pharmaceutical industry scientists and researchers. In this ninth edition of Hugo and Russell's *Pharmaceutical Microbiology*, readers will find a mix of established and new authors bringing practical and research experience to their chapters. Material covering the fundamentals of microbiology, microbial behavior and laboratory investigation. Revised chapters incorporating new material on microbe host interactions, antibiotic resistance, emerging pathogens, public health microbiology, healthcare associated infection and pharmaceutical manufacture. Emerging understandings from the COVID 19 pandemic on infection prevention and control and vaccine development. Practitioners providing their insights on clinical practice and pharmaceutical production. An accompanying website incorporating teaching resources. Hugo and Russell's *Pharmaceutical Microbiology* 9th edition promises to remain the essential text for pharmacy and medical students as well as researchers and industry professionals.
