As the world waits in fear the CDC and world health organizations race to minimize the current pandemic a looming threat that has forced international federal and local governments to deal with COVID19 and other future epidemics and the widespread death and devastation which would follow Will the world find the answers in time Or will we see a deadly threat ravage populations as others have before in 1918 with influenza in the late 18th century with yellow fever or the horrific black death or bubonic plague in 1347 AD Are these viruses examples of evolution Did God make microbes by mistake Are they accidents of evolution out of the primordial soup These timely questions are examined throughout this book from chapter 1 It seems that a new and more terrible disease is touted on the news almost daily The spread of these scary diseases from avian flu to SARS to AIDS is a cause for concern and leads to questions such as Where did all these germs come from How do they fit into a biblical world view What kind of function did these microbes have before the Fall Does antibiotic resistance in bacteria prove evolution How can something so small have such a huge deadly

impact on the world around us Professor Alan Gillen sheds light on these and many other questions in this revealing and detailed book He shows how these constantly mutating diseases are proof for devolution rather than evolution and how all of these germs fit into a biblical world view Dr Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man's sin and the hope we have in the coming of Jesus Christ     *Essential Microbiology* Stuart

Bingel, 2015-08-17 Some things are like this and our attempts to scrutinize only make the obscurity worse For those of us always on this edge is where we function best Chaos erratic behavior it all adds fuel to the fire Makes us keep chasing the elusive answer always there right on the tip of your tongue Like a familiar face sharing some space on a crowded subway in Manhattan while visiting your daughter you nod your head smile and say how you been hoping that the face will divulge who he is so you wont feel terrible because he remembered you but you cant remember his name Like the human psyche going through a mid life crisis where the divergence of two opposing behaviors causes one to have a nervous breakdown quantum physics seeks to lie on the outskirts of our imagination The outskirts are its perturbation point as referred to by physicists The place where we barely are cognizant of its existence Like our unconscious mind small glimpses appear fleetingly that titillate our conscious mind They may appear in a Jungian dream They may appear as synchronicities or de ja vu There is something guttural in human nature about new discovery It has been inside all of us a sleeping giant awakened occasionally It teases us gives us a view that is obscured like flying IFR on a socked in day The instruments can only tell you so much and you are forced to their attention giving in to stolen glances outside the cockpit window at the elusive ground below It is a hair raising experience albeit thrilling      **Grossman's Endodontic Practice** V.
