Economy of Religions in Anatolia and Northern Syria Manfred Hutter,Sylvia Hutter-Braunsar,2019-10-01 Religions are always costly one has to give offerings with material value to the gods one has to provide the salary for religious specialists who offer their service for their clients one has to arrange festivals and liturgies and of course one has to provide the material means for building temples or shrines But these costs also repay as the gods give health or well being as reward for the offerings Even if one can never be absolutely certain about such a reward one at least might earn social reputation because of one s financial involvement in religion But temples are also economic centres employing often in close relation to the palace people as workers craftsmen or intellectuals in different positions whose costs of living are supplied by the temple Individual religious specialists receive payment for their service to cover their own costs of living Although this might sound modern religion and economy were intertwined with each other in ancient society also For this reason the papers of this conference volume analyse and discuss how the cults rituals and institutions in Anatolia in the 2nd and 1st millennium contribute to the economic process in those areas

Microeconomic Policy Clement Allan Tisdell,Keith Hartley,2008-01-01 The new and updated edition of Microeconomic Policy provides an excellent blend of theory and application to foster understanding of economic based policy making The book is eclectic in its approach and addresses a rich set of current applications It is an ideal book for teaching microeconomic based policy analysis to students Todd Sandler University of Texas at Dallas US Designed for students who have already encountered the microeconomic principles this valuable text focusses effectively on their policy implications imbuing the apparently dry theory with its insights for the general welfare William J Baumol New York University US and Princeton University US A distinctive feature of this book is the application of microeconomics to public policy As to be expected given the international reputation of the authors there is a thorough treatment of global environmental policies including the Stern Report and a very useful chapter on issues of defence conflict and terrorism What this text offers and most competing books do not is the breadth of coverage In this revised edition we have integration into the topics of advances in behavioural evolutionary and Austrian economics The relevance to business management and government policy of the material presented makes the subject come alive in application a refreshing change from the curve shifting that dominates traditional microeconomic texts which turns off so many of our students and prevents them from seeing the crucial importance of economics to almost every aspect of our well being John Lodewijks University of Western Sydney Australia This thoroughly accessible textbook shows students how microeconomic theory can be used and applied to major issues of public policy In this way it will improve their understanding of both microeconomic theory and policy and also develop their ability to critically assess them Clem Tisdell and Keith Hartley have expanded upon their previous successful work on microeconomics As a result this new book is considerably updated with substantial chapter revisions as well as new chapters dealing with business management ownership environmental issues public choice defence conflict and terrorism Promoting a thorough understanding of this complex yet fundamental topic Microeconomic Policy A New Perspective will undoubtedly prove an invaluable textbook for all students academics and researchers of economics and public policy
