solutions *Digital Literacy for Technical Communication* Rachel Spilka, 2009-12-04 Digital Literacy for Technical Communication helps technical communicators make better sense of technology's impact on their work so they can identify new ways to adapt, adjust and evolve, fulfilling their own professional potential. This collection is comprised of three sections, each designed to explore answers to these questions: How has technical communication work changed in response to the current digital writing environment? What is important foundational knowledge in our field that all technical communicators need to learn? How can we revise past theories or develop new ones to better understand how technology has transformed our work? Bringing together highly regarded specialists in digital literacy, this anthology will serve as an indispensable resource for scholars, students and practitioners. It illuminates technology's impact on their work and prepares them to respond to the constant changes and challenges in the new digital universe.

Applying Manufacturing Execution Systems Michael McClellan, 1997-08-21 Computer systems have become an integral part of most companies. The newest of these is Manufacturing Execution Systems (MES), a technology that provides on line application software that companies rely on to manage their manufacturing processes. Applying Manufacturing Execution Systems is the book for everyone who has the responsibility of improving their company's manufacturing results. It shows how the current conditions on the plant floor can be optimized to improve production output using an integrated MES. Applying Manufacturing Execution Systems shows how MES benefits all types of manufacturing, from discrete item production to process flow production. The concepts discussed are applicable in all production facilities where a number of variables, whether simple or complex, need to be considered in order to optimize production by effectively using the available resources of people, inventory and equipment. The book emphasizes the application of MES in the real world of manufacturing that includes:

StarBriefs 2001 ,2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions
