Forging a Poison Prevention and Control System Institute of Medicine,Board on Health Promotion and Disease Prevention,Committee on Poison Prevention and Control,2004-08-16 Poisoning is a far more serious health problem in the U S than has generally been recognized It is estimated that more than 4 million poisoning episodes occur annually with approximately 300 000 cases leading to hospitalization The field of poison prevention provides some of the most celebrated examples of successful public health interventions yet surprisingly the current poison control system is little more than a loose network of poison control centers poorly integrated into the larger spheres of public health To increase their effectiveness efforts to reduce poisoning need to be linked to a national agenda for public health promotion and injury prevention Forging a Poison Prevention and Control System recommends a future poison control system with a strong public health infrastructure a national system of regional poison control centers federal funding to support core poison control activities and a national poison information system to track major poisoning epidemics and possible acts of bioterrorism This framework provides a complete system that could offer the best poison prevention and patient care services to meet the needs of the nation in the 21st century Handbook of Poisonous and Injurious Plants Lewis S. Nelson,Richard D. Shih,Michael J. Balick,2007-12-18 The second edition of this book is created to assist the clinician in the initial response to the needs of a child or adult exposed to a poisonous or injurious plant It lists common plants that might lead to the development of the symptom complex and describes the mechanisms of action of the implicated toxin additional clinical manifestations and specific therapeutics for each presentation It has methodically enhanced the previous edition s botanical

rigor with insights from both pharmacognosy and clinical medicine to make it a truly comprehensive source for anyone who has an interest in plants *Child Neurology* John H. Menkes,Harvey B. Sarnat,Bernard L. Maria,2006 Revised to incorporate the latest advances in the neurosciences and clinical neurology the Seventh Edition of this classic text provides practical cost effective problem solving approaches to all diseases affecting the developing nervous system In clinically relevant terms the book explains how recent developments in molecular biology genetics neurochemistry neurophysiology neuropathology and neuroimaging impact on diagnosis and treatment Chapters focus on specific disorders or groups of disorders and emphasize differential diagnosis disease course treatment and prognosis This edition has a new chapter on mitochondrial cytopathies **Prepare for the Pediatric Emergency Medicine Board Examination** Muhammad
