Good Chemistry Paper Topics:

For Better or For Worse? Collaborative Couples in the Sciences Annette Lykknes, Donald L. Opitz, Brigitte Van Tiggelen, 2012-06-05 In this volume a distinguished set of international scholars examine the nature of collaboration between life partners in the sciences with particular attention to the ways in which personal and professional dynamics can foster or inhibit scientific practice Breaking from traditional gender analyses which focus on divisions of labor and the assignment of credit the studies scrutinize collaboration as a variable process between partners living in the nineteenth and twentieth centuries who were married and divorced heterosexual and homosexual aristocratic and working class and politically right and left The contributors analyze cases shaped by their particular geographical locations ranging from retreat settings like the English countryside and Woods Hole Massachusetts to university laboratories and urban centers in Berlin Stockholm Geneva and London The volume demonstrates how the terms and meanings of collaboration variably shaped by disciplinary imperatives cultural mores and the agency of the collaborators themselves illuminate critical intellectual and institutional developments in the modern sciences

Major Research Topics in Combustion M.Y. Hussaini, A. Kumar, R.G. Voigt, 2012-12-06 The Institute for Computer Applications in Science and Engineering ICASE and NASA Langley Research Center LaRC brought together on October 24 1989 experts in the various areas of combustion with a view to expose them to some combustion problems of technological interest to LaRC and possibly foster interaction with the academic community in these research areas The topics chosen for this purpose were flame structure flame stability flame holding extinction chemical kinetics turbulence kinetics in interaction transition to detonation and reacting free shear layers The lead paper set the stage by discussing the status and issues of supersonic combustion relevant to scramjet engine Then the experts were called upon i to review the current status of knowledge in the aforementioned areas ii to focus on how this knowledge can be extended and applied to high speed combustion and iii to suggest future directions of research in these areas Each topic was then dealt with in a position paper followed by formal discussion papers and a general discussion involving the participants The position papers discussed the state of the art with an emphasis on key issues that needed to be resolved in the near future The discussion papers critically examined these issues and filled in any lacunae therein The edited versions of the general discussions in the form of questions from the audience and answers from the speakers are included wherever possible to give the reader the flavor of the lively interactions that took place
