Exploring Gis 2E with Goodes Atlas and Success Set Sticker Set Chrisman,2002-09-01 **Radical Cartography**

William Rankin,2025-11-11 This is it the full download from a true genius of cartography Radical Cartography will make you see maps and indeed your place on the planet with fresh eyes Daniel Immerwahr author of How to Hide an Empire A stunning thought provoking exploration of how maps shape our understanding of the world featuring over 150 full color maps in a gorgeous package Maps are ubiquitous in contemporary life not just for navigation but for making sense of our society our environment and even ourselves In an instant huge datasets can be plotted on command and we can explore faraway places in exacting detail Yet the new ease and speed of data mapping can often lead to the same results as ever over simplified maps used as tools for top down control Cartographer and historian William Rankin argues that it s time to reimagine what a map can be and how it can be used Maps are not neutral visualizations of facts They are innately political defining how the world is divided what becomes visible and what stays hidden and whose voices are heard What matters isn t just the topics or the data but how maps make arguments about how the world works And the consequences are enormous A map s visual argument can change how cities are designed and how rivers flow how wars are fought and how land claims are settled how children learn about race and how colonialism becomes a habit of mind Maps don t just show us information they help construct our world Brimming with vibrant maps including many radical maps created by Rankin himself and by other cutting edge mapmakers Radical Cartography exposes the consequences of how maps represent boundaries layers people projections color scale and time Challenging the map as a tool of the status quo Rankin empowers readers to embrace three unexpected values for the future of cartography uncertainty multiplicity and subjectivity Changing the tools changing the maps can change the questions we ask the answers we accept and the world we build **Borderlines and Borderlands**

Alexander C. Diener,Joshua Hagen,2010-01-16 From our earliest schooldays we are shown the world as a colorful collage of countries each defined by their own immutable borders What we often don t realize is that every political boundary was created by people No political border is more natural or real than another yet some international borders make no apparent sense at all While focusing on some of these unusual border shapes this fascinating book highlights the important truth that all borders even those that appear normal are social constructions In an era where the continued relevance of the nation state is being questioned and where transnationalism is altering the degree to which borders effectively demarcate spaces of belonging the contributors argue that this point is vital to our understanding of the world The unique and compelling histories of some of the world s oddest borders provide an ideal context for this group of experts to offer accessible and enlightening discussions of cultural globalization economic integration international migration imperialism postcolonialism global terrorism nationalism and supranationalism Each author s regional expertise enriches a textured account of the historical context in which these borders came into existence as well as their historical and ongoing influence on the people
