1 2 **The Ideas That Rule Us** Chris Grocott,2024-10-07 It may seem surprising that the economic choices we make in society are often determined by ideas rather than scientific evidence or financial resources The consequences of such choices are often stark such as the austerity policies which eroded our ability to withstand crises like the Covid 19 pandemic This book explores the ideas that rule how our economy works how government operates and how workers organise A small number of historical economic ideas remain stubbornly prevalent and powerful today However they are largely based on questionable assumptions about human behaviour and unproven theoretical ideas about economics They were founded within the realms of philosophy and politics rather than hard science This book illustrates how politicians have selectively borrowed convenient economic concepts in order to promote and defend policies which entrench and escalate inequalities and other structural problems This accessible book invites readers to question the ideas that rule us and explore the challenges facing society It invites progressive thought about how we need to urgently organise action for the future *The Future, Declassified* Mathew Burrows,2025-06-25 Twenty five years ago when Mathew Burrows went to work for the CIA as an intelligence analyst the world seemed frozen Then came the fall of the Berlin Wall and the implosion of the Soviet Union suddenly unpredictability became a universal theme and foresight was critical For the past decade Burrows has overseen the creation of the Global Trends report the key futurist guide for the White House Departments of State and Defense and

Homeland Security Global Trends has a history of making bold predictions and being right In 2004 it argued that al Qaeda s centralized operations would dissolve and be replaced by groups cells and individuals the very model of the 2012 Boston bombings In 2008 it included a scenario dubbed October Surprise imagining a devastating late season hurricane hitting an unprepared New York City In The Future Declassified Burrows for the first time has expanded the most recent Global Trends report into a full length narrative forecasting the tectonic shifts that will drive us to 2030 A staggering amount of wholesale change is happening from unprecedented and widespread aging to rampant urbanization and growth in a global middle class to an eastward shift in economic power and a growing number of disruptive technologies Even our physical geography is changing as sea levels rise and faster commercial shipping routes open up through a warming Arctic region The book concludes with its most provocative section four fictional paths to 2030 with imagined storylines and characters based on analysis by the most authoritative figures in the intelligence community As Burrows argues we are living through some of the greatest and most momentous developments in history Either we take charge and direct those or we are at their mercy The stakes are particularly high for America s standing in the world and for ordinary Americans who want to maintain their quality of life Running the gamut from scary to reassuring this riveting book is essential reading

Experts,2019-10-21 **Marxist Historiographies** Q. Edward Wang,Georg G. Iggers,2015-07-16 Marxist Historiographies is the first book to examine the ebb and flow of Marxist historiography from a global and cross cultural perspective Since the eighteenth century few schools of historical thought have exerted a more lasting impact than Marxism and this impact extends far beyond the Western world within which it is most commonly analysed Edited by two highly respected authors in the field this book deals with the effect of Marxism on historical writings not only in parts of Europe where it originated but also in countries and regions in Africa Asia North and South America and the Middle East Rather than presenting the chapters geographically it is structured with respect to how Marxist influence was shown in the works of historians in a particular area This title takes a dual approach to the subject some chapters are national in scope addressing the Marxist impact on historical practices within a country whereas others deal with the varied expressions of Marxist historiography throughout a wider region Taking a truly global perspective on this topic Marxist Historiographies demonstrates clearly the breadth and depth of Marxism s influence in historical writing throughout the world and is essential reading for all students of historiography

Men in reserve Juliette Pattinson,Arthur McIvor,Linsey Robb,2017-02-01 Men in reserve focuses on working class civilian men who as a result of working in reserved

occupations were exempt from enlistment in the armed forces It uses fifty six newly conducted oral history interviews as well as autobiographies visual sources and existing archived interviews to explore how this group articulated their wartime experiences and how they positioned themselves in relation to the hegemonic discourse of military masculinity It considers the range of masculine identities circulating amongst civilian male workers during the war and investigates the extent to which reserved workers draw upon these identities when recalling their wartime selves It argues that the Second World War was capable of challenging civilian masculinities positioning the civilian man below that of the soldier hero while simultaneously reinforcing them by bolstering the capacity to provide and to earn high wages frequently in risky and dangerous work all which were key markers of masculinity

The Political Economy and Media Coverage of the European Economic Crisis Julien Mercille, 2014-08-27 The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent it has failed to revive economies The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light even if the latter's aim has been to shift the burden of adjustment onto citizens This book explains how and why using a critical political economic perspective and focusing on the case of Ireland Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe's peripheral countries Through a systematic analysis of Ireland's main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the

crisis **Education, Travel and the 'Civilisation' of the Victorian Working Classes** Michele M. Strong, 2014-01-23

Examining four major institutions Michele Strong considers the experiences of working men and women particularly artisans but also young apprentices and clerks who travelled abroad as participants in an educational reform movement spearheaded by middle class liberals **Revolutionary Art and Politics in Egypt** Rounwah Adly Riyadh Bseiso, 2023-01-26 This book

Class Dynamics of Development Jonathan Pattenden, Liam Campling, Satoshi Miyamura, Benjamin Selwyn, 2018-12-07 This book argues that class relations are constitutive of development processes and central to understanding inequality within and between countries It does so via a transdisciplinary approach that draws on case studies from Asia Latin America and sub Saharan Africa Contributors illustrate and explain the diversity of forms of class relations and the ways in which they interplay with other social relations of dominance and subordination such as gender and ethnicity as part of a wider project to revitalise class analysis in the study of development problems and experiences Class is conceived as arising out of exploitative social relations of production but is formulated through and expressed by multiple determinations By illuminating the diversity of social formations this book illustrates the depth and complexity present in Marx s method This book was originally published as a special issue of Third World Quarterly *Awaiting Their Feast* Lori

A. Flores, 2025-01-10 Though Latinx foodways are eagerly embraced and consumed by people across the United States the nation exhibits a much more fraught relationship with Latinx people including the largely underpaid and migrant workers who harvest process cook and sell this desirable food Lori A Flores traces how our dual appetite for Latinx food and Latinx food labor has evolved from the World War II era to the COVID 19 pandemic using the US Northeast as an unexpected microcosm of this national history Spanning the experiences of food workers with roots in Mexico Puerto Rico Cuba the Dominican Republic Haiti and Central America Flores s narrative travels from New Jersey to Maine and examines different links in the food chain from farming to restaurants to seafood processing to the deliverista rights movement What unites this eclectic material is Flores s contention that as our appetite for Latinx food has grown exponentially the visibility of Latinx food workers has demonstrably decreased This precariat is anything but passive however and has historically fought and is still fighting against low wages and exploitation medical neglect criminalization and deeply ironic food insecurity

Energy Efficiency Steven Fawkes, 2016-04-29 Energy risk has reappeared on the corporate and social agenda with a bang and the complexity of the issues has increased many fold since the days of the last great wave of concern following the oil crises of the 1970s. Steven Fawkes' *Energy Efficiency* is a comprehensive guide for managers and policy makers to the fundamental questions underpinning energy efficiency and our responses to it: what do we really mean by energy efficiency? what is the potential in different dimensions? why is it important? what management processes lead to optimisation of energy efficiency? what technologies are useful for improving energy efficiency? what policies can be used to promote energy efficiency? how can energy efficiency be financed? how can energy suppliers engage with energy efficiency? The result is the most comprehensive review to date of the barriers and opportunities associated with improving energy efficiency. Clearly written and erudite, Steven Fawkes addresses every aspect of energy efficiency including the huge and vitally important untapped potential offered by effective energy management and the application of existing technology. He also identifies barriers such as the rebound effect and how they can be mitigated and he provides a comprehensive review of innovative energy efficiency financing options. This book is a must read for anyone with an interest in energy supply and demand reduction.

Pilgrimage Tourism of Diaspora Africans to Ghana Ann Reed, 2014-08-27 Processes of globalization have led to diasporic groups longing for their homelands. One such group includes descendants from African ancestors displaced by the trans-Atlantic slave trade who may be uncertain about their families' exact origins. Traveling home often means visiting African sites associated with the slave trade, journeys full of expectations. The remembrance of the slave trade and pilgrimages to these heritage sites bear resemblance to other diasporic travels that center on trauma, identification and redemption. Based on over two years of ethnographic fieldwork with both diaspora Africans and Ghanaians, this book explores why and how Ghana has been cast as a pilgrimage destination for people of African descent, especially African Americans. Grounding her research in Ghana's Central Region where slavery heritage tourism and political ideas promoting incorporation into one African family are prominent, Reed also discusses the perspectives of ordinary Ghanaians, tourism stakeholders and diasporan repatriates. Providing ethnographic insight into the transnational networks of people and ideas entangled in Ghana's pilgrimage tourism, this book also contributes to better understanding the broader global phenomenon of diasporic travel to homeland centers.

The Struggle Is Eternal Joseph R. Fitzgerald, 2018-12-14 Many prominent and well-known figures greatly impacted the civil rights movement, but one of the most influential and unsung leaders of that period was Gloria Richardson. As the leader of the Cambridge Nonviolent Action Committee (CNAC), a multifaceted liberation campaign formed to target segregation and racial inequality in Cambridge, Maryland, Richardson advocated for economic

justice and tactics beyond nonviolent demonstrations Her philosophies and strategies including her belief that black people had a right to self defense were adopted often without credit by a number of civil rights and black power leaders and activists The Struggle Is Eternal Gloria Richardson and Black Liberation explores the largely forgotten but deeply significant life of this central figure and her determination to improve the lives of black people Using a wide range of source materials including interviews with Richardson and her personal papers as well as interviews with dozens of her friends relatives and civil rights colleagues Joseph R Fitzgerald presents an all encompassing narrative From Richardson s childhood when her parents taught her the importance of racial pride through the next eight decades Fitzgerald relates a detailed and compelling story of her life He reveals how Richardson s human rights activism extended far beyond Cambridge and how her leadership style and vision for liberation were embraced by the younger activists of the black power movement who would carry the struggle on throughout the late 1960s and into the 1970s

The Oxford Handbook of Africa and Economics Célestin Monga,Justin Yifu Lin,2015-07-02 A popular myth about the travails of Africa holds that the continent s long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments While intellectually charming and often elegantly formulated that conventional wisdom is actually contradicted by historical evidence and common sense It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure In fact the argument underlining that reasoning is tautological and the policy prescriptions derived from it are fatally teleological low income countries are by definition those where such ingredients are missing None of today s high income countries started its growth process with the required and complete list of growth ingredients Unless one truly believes that the continent of Africa and most developing countries are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism the conventional view must be re examined debated and questioned This volume the second of the lOxford Handbook of Africa and Economics reassesses the economic policies and practices observed across the continent since independence It offers a collection of analyses by some of the leading economists and development thinkers of our time and reflects a wide range of perspectives and viewpoints Africa s emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book

Tourism and Citizenship Raoul Bianchi,Marcus Stephenson,2014-02-24 More than sixty years since the 1948 Universal Declaration of Human Rights first enshrined the right to freedom of movement in an international charter of human rights the issue of mobility and the right to tourism itself have become increasingly significant areas of scholarly interest and political debate However despite the fact that cross border travel implies certain citizenship rights as well as the material capacity to travel the manifold intersections between tourism and citizenship have not received the attention they

deserve in the literature This book endeavours to fill this gap by being the first to fully examine the role of tourism in wider society through a critically informed sociological reflection on the unfolding relationships between international tourism and distinct renderings of citizenship with particular emphasis on the ideological and political alignments between the freedom of movement and the right to travel The text weaves its analysis of citizenship and travel in the context of addressing large scale societal transformations engendered by globalization neoliberalism and the geopolitical realignments between states as well as comprehending the internal reconfiguring of the relationship between citizens and states themselves By doing so it focuses on key themes including tourism and social citizenship rights race culture and minority rights states markets and the freedom of movement tourism peace and geo politics consumerism and class and ethical tourism global citizenship and cosmopolitanism The book concludes that the advancement of genuinely democratic and just forms of tourism must be commensurate with demands for distributive justice and a democratic politics of mobility encompassing all of humanity This timely and significant contribution to the sociology and politics of international tourism through the lens of citizenship is a must read for students and scholars in both in the fields of tourism and social science The royalties received from this book will be donated to the International Porter Protection Group
