especially from underrepresented communities in wildlife professions Women in Wildlife Science is dedicated to the work of  
promoting equity diversity and inclusion in wildlife conservation and management Editors Carol L Chambers and Kerry L  
Nicholson collaborate with a diverse team of authors to analyze the status and celebrate the achievements of women in  
wildlife science They share proven models and propose new methods to increase the inclusion of women in wildlife  
professions based on an intersectional framework Centering perspectives from LGBTQ people women of color and members  
of other marginalized communities this is a groundbreaking and vitally important resource Covering academic and  
professional spheres Women in Wildlife Science draws on enlightening personal stories and peer reviewed scientific  
literature unavailable anywhere else to explain the challenges women face in the field of wildlife conservation and  
management The contributors tackle pivotal issues from recruitment into academic programs to hiring practices and ways to  
support career advancement in federal state local tribal and private sectors Each chapter includes practical advice and  
original exercises constructed to help administrators educators managers allies and mentors move intentions into action This  
pragmatic guide will help to ensure a more diverse just and equitable future for a workforce dedicated to preserving wildlife  
and the whole of the natural world      *Ethics in the University* James G. Speight,2016-08-26 It is the continuous reports of  
unethical behavior in the form of data manipulation cheating plagiarism and other forms of unacceptable behavior that draw  
attention to the issues of misconduct The causes of misconduct are manifold whether it is the need to advance in a chosen  
discipline or to compete successfully for and obtain research funding Disappointingly individuals who are oriented to any  
form of dishonesty are individuals who had previously displayed little or no consideration for the feelings of others and are  
therefore more interested in themselves at the expense of the students and others recognizing them by any means necessary  
This ground breaking and honest examination of ethics in the university setting is unabashed in its descriptions of  
misconduct in the academic world The text is well furbished with numerous citations that point to academic misconduct and  
the final chapter deals with the means by which misconduct can be mitigated a strong reminder to everyone in the academic  
community that above board conduct must be part of our overall message of learning and part of the whole point of

education in the first place A must have for academics and non academics alike this text is the second in a series of books on ethics by James G Speight and it is useful to anyone in any industry who is interested in ethical behavior and how to navigate the sometimes murky depths of our professional lives      *Monthly Catalog of United States Government Publications* ,1992

Following the end of apartheid in 1994 the ANC government placed education at the centre of its plans to build a nonracial and more equitable society Yet by the 2010s a wave of student protests voiced demands for decolonised and affordable education By following families and schools in Durban for nearly a decade Mark Hunter sheds new light on South Africa s political transition and the global phenomenon of education marketisation He rejects simple descriptions of the country s move from race to class apartheid and reveals how white phenotypic traits like skin colour retain value in the schooling system even as the multiracial middle class embraces prestigious linguistic and embodied practices the book calls white tone By illuminating the actions and choices of both white and black parents Hunter provides a unique view on race class and gender in a country emerging from a notorious system of institutionalised racism      **Cumulative Author Index to**
