Department of Homeland Security Appropriations for 2014 United States. Congress. House. Committee on Appropriations. Subcommittee on Homeland Security,2013   *Caught in the Act* Cyril Julie,Lorna Holtman,Charles R. Smith,2019-12-11 The research reported in Caught in the Act draws together the insights gained from a continuous professional development initiative for high school mathematics teachers teaching in low socio economic status and socially challenged environments in South Africa The chapters show the possibilities for enhancing achievement in school mathematics if a strength based approach is adopted to develop teaching with teachers and when their concerns are taken seriously The book demonstrates that the ecological relevance fitness for the context in which teachers are teaching of the goods developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education The book is of interest to mathematics teachers school leaders mathematics curriculum advisors policy makers and researchers   The Schenley Experiment Jake Oresick,2017-04-14 The Schenley Experiment is the story of Pittsburgh s first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace s reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America s oldest public schools   **Locally AH-Algebras** Huaxin Lin,2015-04-09 A unital separable algebra is said to be locally AH with no dimension growth if there is an integer satisfying the following for any and any compact subset there is a unital subalgebra of with the form where is a compact metric space with covering dimension no more than and is a projection such that The authors prove that the class of unital separable simple algebras which are locally AH with no dimension growth can be classified up to isomorphism by their Elliott invariant As a consequence unital separable simple algebras which are

locally AH with no dimension growth are isomorphic to a unital simple AH algebra with no dimension growth

Multi-Parameter Hardy Spaces Theory and Endpoint Estimates for Multi-Parameter Singular Integrals Guozhen Lu,Lu Zhang,Jiawei Shen,2023-01-18 View the abstract   **Teaching and Learning Secondary School Mathematics** Ann Kajander,Jennifer Holm,Egan J Chernoff,2018-10-24 This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada The chapters address topics of broad applicability such as technology in learning mathematics recent interest in social justice contexts in the learning of mathematics as well as Indigenous education The voices of classroom practitioners the group ultimately responsible for implementing this new vision of mathematics teaching and learning are not forgotten Each section includes a chapter written by a classroom teacher making this volume unique in its approach We have much to learn from one another and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step   *Property (T) for Groups Graded by Root Systems* Mikhail Ershov,Andrei Jaikin-Zapirain,Martin Kassabov,2017-09-25 The authors introduce and study the class of groups graded by root systems They prove that if is an irreducible classical root system of rank and is a group graded by then under certain natural conditions on the grading the union of the root subgroups is a Kazhdan subset of As the main application of this theorem the authors prove that for any reduced irreducible classical root system of rank and a finitely generated commutative ring with the Steinberg group and the elementary Chevalley group have property They also show that there exists a group with property which maps onto all finite simple groups of Lie type and rank thereby providing a unified proof of expansion in these groups   **Analytical and Stochastic Modelling Techniques and Applications** Bruno Sericola,Telek Miklós,Gábor Horváth,2014-05-28 This book constitutes the refereed proceedings of the 21st International Conference on Analytical and Stochastic Modelling Techniques and Applications ASMTA 2014 held in Budapest Hungary in June July 2014 The 18 papers presented were carefully reviewed and selected from 27 submissions The papers discuss the latest developments in analytical numerical and simulation algorithms for stochastic systems including Markov processes queueing networks stochastic Petri nets process algebras game theory etc   **Topologically Protected States in One-Dimensional Systems** Charles Fefferman,James P. Lee-Thorp,M. I. Weinstein,2017-04-25 The authors study a class of periodic Schrodinger operators which in distinguished cases can be proved to have linear band crossings or Dirac points They then show that the introduction of an edge via adiabatic modulation of these periodic potentials by a domain wall results in the bifurcation of spatially localized edge states These bound states are associated with the topologically protected zero energy mode of an asymptotic one dimensional Dirac operator The authors model captures many aspects of the phenomenon of topologically protected edge states for two dimensional bulk structures such as the honeycomb structure of graphene The states the authors construct can

be realized as highly robust TM electromagnetic modes for a class of photonic waveguides with a phase defect *The Complete Book of Colleges, 2017 Edition* Princeton Review,2016-07 The MEGA GUIDE to 1 355 COLLEGES AND UNIVERSITIES No one knows colleges better than The Princeton Review Inside The Complete Book of Colleges 2017 Edition you ll find meticulously researched information that will help you narrow the search for the best college for you Each of the 1 355 user friendly profiles answers your questions including How much are tuition and other student fees and costs What types of financial aid are available and when are the applications due What do admissions officers most look for in test scores and recommendations Which majors are the most popular and have the highest enrollment What is the housing like and how accessible is technology on campus What are the key campus organizations athletics and student activities How selective is the school Plus Indexes based on cost selectivity and size that will help you narrow your search Get a leg up on your college search with this easy to use comprehensive and savvy guidebook from the experts at The Princeton Review **The State of the System** Paul W. Bennett,2020-09-23 Over the last fifty years Canada s public schools have been absorbed into a modern education system that functions much like Max Weber s infamous iron cage Crying out for democratic school level reform the system is now a centralized bureaucratic fortress that every year becomes softer on standards for students less accessible to parents further out of touch with communities and surprisingly unresponsive to classroom teachers Exploring the nature of the Canadian education order in all its dimensions The State of the System explains how public schools came to be so bureaucratic confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces and addresses the need for systemic reform Going beyond a diagnosis of the stresses strains and ills present in the system Paul Bennett proposes a bold plan to re engineer schools on a more human scale as the first step in truly reforming public education In place of school consolidation and managerialism one size fits all uniformity limited school choice and the success for all curriculum Bennett advocates for a new set of priorities decentralize school governance deprogram education ministries and school districts listen to parents and teachers and revitalize local education democracy Tackling the thorny issues besetting contemporary school systems in Canada The State of the System issues a clarion call for more responsive engaged and accountable public schools **The Complete Book of Colleges, 2018 Edition** Princeton Review,2017-07 Includes information on admissions cost financial aid required and recommended admissions criteria cost breakdowns and types of financial aid for 1 355 colleges and universities **Women in Wildlife Science** Carol L.
