Mombourquette, 2016-01-21 This book captures the lived experiences of school principals engaged in meeting the standards of practice inherent in the Professional Practice Competencies for School Leaders in Alberta. These principals tell their own stories of how they meet the competencies mandate of building relationships, establishing and living a school vision, leading a learning community, providing instructional leadership, developing leadership in others, managing the organization, and responding to the societal needs of the context within which the schools are located. In addition, as authors, we provide a theoretical framework for the competencies and situate them within scholarly research. *New Technologies in*

Peter Marinkovich, 2021-08-01 While science and technology have been moving at speed in the last decade and major investments have been placed in Artificial Intelligence, blockchain technology, 3D printing, and gene editing, medical practice, including cutaneous medicine, otherwise known as Dermatology, is only just starting to follow these technological advances.
