well recognized to be more common in autistic individuals compared to the general population e.g. sleep/wake disorders, epilepsy, sensory impairments. However, the prevalence and the impact on autistic individuals and their families of other physical and medical conditions such as cardiovascular conditions, cancer, musculoskeletal conditions, food intolerance, allergies, autoimmune problems, diabetes, and neurocutaneous disorders have yet to be established. The presence of such co-occurring conditions affects the success of treatment and worsens the quality of life of autistic individuals and their carers. Importantly, the awareness of the presence of specific physical and medical conditions associated with autism allows for targeted interventions and better outcomes.
