The Thinking Past Adrian Cole,Stephen Ortega,2014-08-26 This book takes an analytical approach to world history Instead of proceeding through history descriptively it looks at several major questions and ideas such as the role of technology the development of universal religions global trade or participatory politics If this sounds thematic it is But it also progresses chronologically analyzing these themes as they apply in certain eras We use both primary sources in text and the latest scholarship as secondary source These we use frequently in each chapter both to employ the voices of scholars where they say things better than we could and footnote them for students reference We also hope to convey the sense that all this content is part of an ongoing debate amongst historians and scholars from different disciplines Finally we attempt to keep the text accessible by focusing on narrative elements of history and keeping in mind that the readers are undergraduates often with little exposure to the subject matter However the level of ideas remains high Provided by publisher **Key Metaphors for History** Javier Fernández-Sebastián,2024-04-03 This book casts a fresh look at what to date has been a relatively unexplored question the enormous value and usefulness of the metaphor in the understanding and writing of history and at the historical culture reflected by these metaphors Mapping a wide range of tropes present in historiography

and public discourse the book identifies some of the key metaphorical resources employed by historians politicians and journalists to represent time history memory the past the present and the future and examines a selection of analytical concepts of a temporal nature built upon unmistakeably metaphorical foundations such as modernity event process revolution crisis progress decline or transition The analysis of these and other pillars on which modern history has been built whether as a philosophy of history as an academic discipline or as a set of events will interest graduates and scholars dealing with the historical and social sciences and the humanities in general Key Metaphors for History offers a broad overview of historiography and historiosophy from an unfrequented point of view halfway between conceptual history theory of history and metaphorology Moreover it constitutes a form of self reflection of the historian on his or her own positionality when researching and writing history
