Confronting and combating Islamophobia in America Islamophobia has long been a part of the problem of racism in the United States and it has only gotten worse in the wake of shocking terror attacks the ongoing refugee crisis and calls from public figures like Donald Trump for drastic action As a result the number of hate crimes committed against Middle Eastern Americans of all origins and religions have increased and civil rights advocates struggle to confront this striking reality In Islamophobia and Racism in America Erik Love draws on in depth interviews with Middle Eastern American advocates He shows that rather than using a well worn civil rights strategy to advance reforms to protect a community affected by racism many advocates are choosing to bolster universal civil liberties in the United States more generally believing that these universal protections are reliable and strong enough to deal with social prejudice In reality Love reveals civil rights protections are surprisingly weak and do not offer enough avenues for justice change and community reassurance in the wake of hate crimes discrimination and social exclusion A unique and timely study Islamophobia and Racism in America wrestles with the disturbing implications of these findings for the persistence of racism including Islamophobia in the twenty first century As America becomes a majority minority nation this strategic shift in American civil rights advocacy signifies challenges in the decades ahead making Love s findings essential for anyone interested in the future of universal civil rights in the United States *Mobile Technology and the Transformation of Public Alert and Warning* Hamilton Bean,2019-10-01

The Information Animal Alicia Wanless, 2025-05-22 Depending on the news you read new tools like AI will either save or destroy us But our response to emerging technology s unprecedented threats actually follows a pattern as old as civilisation From ancient Athens to COVID 19 social media to spam Alicia Wanless shows how humans have always consumed information whether accurate or not First a new technology changes how information is shared broadening its availability and accelerating how fast it travels Then as more people engage with this new content fresh ideas arise often challenging prevailing beliefs Some use the new tools to promote their views win power or simply

profit adding to the mounting information pollution Competition and conflict follow We scramble in vain to control information flows and use of the new technology With democracies worldwide lurching from crisis to crisis knee jerk reactions to information conflict won't suffice What's needed is an understanding of our nature as information animals in a millennia long relationship with technology and of how a content saturated world impacts the political battle for hearts and minds

The Limits to Scarcity Lyla Mehta, 2013-05-13 Scarcity is considered a ubiquitous feature of the human condition It underpins much of modern economics and is widely used as an explanation for social organisation social conflict and the resource crunch confronting humanity's survival on the planet It is made out to be an all pervasive fact of our lives be it of housing food water or oil But has the conception of scarcity been politicized naturalized and universalized in academic and policy debates Has overhasty recourse to scarcity evoked a standard set of market institutional and technological solutions which have blocked out political contestations overlooking access as a legitimate focus for academic debates as well as policies and interventions Theoretical and empirical chapters by leading academics and scholar activists grapple with these issues by questioning scarcity's taken for granted nature They examine scarcity debates across three of the most important resources food water and energy and their implications for theory institutional arrangements policy responses and innovation systems The book looks at how scarcity has emerged as a totalizing discourse in both the North and South The scare of scarcity has led to scarcity emerging as a political strategy for powerful groups Aggregate numbers and physical quantities are trusted while local knowledges and experiences of scarcity that identify problems more accurately and specifically are ignored Science and technology are expected to provide solutions but such expectations embody a multitude of unexamined assumptions about the nature of the problem about the technologies and about the institutional arrangements put forward as a fix Through this examination the authors demonstrate that scarcity is not a natural condition the problem lies in how we see scarcity and the ways in which it is socially generated
